\$2.00 PER ANNUM

BLAIRMORE One Day Monday, August 6th

COLE & ROGERS SHOWS WILL SOON EXHIBIT HERE

Now is the time to see (according to the youngsters and many grown-ups) the four greatest words in the English language—the Circus is Coming. Assemble as many words as you will and there is no combination that can awaken the same thrill of expectancy as the announcement that the circus, most democratic of all amusements, is on its way to upset for a day the social and domestic arrangements of town and country.

When the news spreads, as it will, with lightning speed, small boys will suddenly take on the characteristics of saints and the appearance of purity that will surprise the natives.

Cole & Rogers Circus begins at once to gaily deck the countryside with its appealing lithographs and direct attention to Monday, August 6th, as the day when two performances will be given on the usual show-grounds in Blairmore, rain or shine.

Watch now for the outward signs of a model child in the home. The Sunday school picnic is just a picnic; the orange and sack of candy hanging from the Christmas tree is just something to eat—but the circus is an event, a day of days when boyhood and girlhood takes on saintly ways and answers when called but once to do that little chore which, at other times, is a fancied piece of drudgery.

Cole & Rogers promise a show that will gladden the heart of childhood and stir memories of youth for grown folk who go to every circus that comes along "just to take the children." Wild animals that have been pictured as coming with the circus in real life; strange beasts and birds from mountain and jungle. There will be a gala display of athletes, riders, trapeze performers and men and women of extraordinary ability in entertaining.

Curious animals are in the allotment of Cole & Rogers attractions—ranging in size from the ponderous elephant to tiny "Pewee," the perfectly formed horse; smallest in the world with a weight of only forty pounds and a height of only twenty-six inches. In these days of the motor, horses of normal structure are becoming rare enough, but "Pewee" is indeed an equine curiosity, no larger than a watch-dog, yet perfect in form. "Pewee" is a tiny thing, but is a rare attraction with a circus that has many appealing items of delightful entertaining qualities.

VICE-REGAL PARTY VISITING PEACE RIVER

Their Excellencies Lord and Lady Willington are touring the Peace River country. From Peace River, where they arrived by train from Edmonton, they are motoring to Grande Prairie and thence to Pouce Coupe, Fort St. John and Hudson's Hope; returning to Peace River by boat. This itinerary has been arranged to enable them to inspect the districts where such a marked increase in settlement is taking place during the present season, as well as to view many of the scenic beauties of the far north.

BLAIRMORE FIRST AID TEAM DOMINION CHAMPIONS

In the recent First Aid competitions, conducted under the auspices of the St. John Ambulance Association, the Blairmore West Canadian Colliers' team, under the captaincy of Mr. M. H. Congdon, was successful in winning the Coderre cup, symbolic of the Dominion championship for miners. The team was composed of M. H. Congdon, captain; J. McAndrew, Harvey Carmichael and Andy Hnatyashyn.

We understand that Blairmore also won second place in the open provincial contest.

BLAIRMORE TEACHING STAFF COMPLETE

The staff for the Blairmore high and public schools for the term beginning August 27th is now complete, as follows: Principal, Mr. Donald McPherson; vice-principal, J. M. Sweeney, B.A., of Kyle; Miss Catherine Chrystal, B.A., Kathleen Tompkins, Sarah McVey, Dorothy Cox, Florence D. Warner, Benvenuta Fossi, Lydia Brunetto, Gwen McDonald, Mrs. Fleming and Mrs. M. E. A. Smith, of Edmonton, primary specialist.

At a meeting of the board held last week, the above contracts were completed. Contracts were also entered into with J. Hughes, for the painting of the exterior woodwork of the central school building, and with Mr. C. H. Erickson for the laying of new floors in two rooms and part of a hallway and for re-treading of the interior back stairs. Repairs are also being effected to the roof on a portion of the west side.

MUDIMAN—SMITH

A quiet but very pretty wedding was solemnized in the presence of the immediate relatives, at the United church, Macleod, Wednesday afternoon, June 18th, when Freda Gertrude Morhouse, only daughter of the late Rev. Jonathan Smith and Mrs. Smith, of Santa Barbara, California, became the bride of Thomas Edward Mudiman, second son of Mr. David Mudiman (deceased) and Mrs. Mudiman, of Macleod, Rev. Mr. Knight, M.A., B.D., officiating.

The bride is a graduate of the University of Alberta; and the groom a member of the Alberta Provincial Police force, who served overseas with the Fort Garry Horse.

Immediately after the ceremony the happy couple left for a motor trip through northern Alberta; and on their return will make their home in Manyberries—Macleod Times.

Constable Mudiman was a former member of the A.P.P. detachment in Blairmore.

DEATH OF MRS. T. BECK

After a lingering illness of several weeks, Mrs. Thomas Beck passed quietly away at the Fernie hospital on Monday last. Deceased was a resident of Fernie for thirty years, having come here in 1898 from Gore Bay, Ontario, and was loved and respected by all who knew her. She was an active member of the I.O.D.E., the Rebekah Lodge and the Church of England, and her death will leave a gap in those institutions which will be hard to fill.

The funeral, which was held from the Church of England on Wednesday, was very largely attended, the building being crowded to the doors. The sorrowing husband and daughter have the sincere sympathy of the entire community in their bereavement—Fernie Free Press, July 19th.

MORE BUFFALO MOVED NORTH

With the final shipment which left early in July, the total number of buffalo transferred this season from the Wainwright Park to the reserve on the northern boundary of the province, reached 1088 head.

Fennican prepared from the flesh of buffalo slaughtered at the park last winter is being shipped to an eastern port for transportation to the natives in the Eastern Arctic. Consignments of this product, have already been forwarded by water to the Eskimos in the vicinity of Akluvik where it is understood to have met with considerable favor.

ST. LUKE'S CHURCH

Rev. A. D. Currie will conduct service on Sunday, 29th July, as follows: Evening service at 7 p.m.

An elder with a very long nose was shaving before he went to church, and made a cut with the razor on the tip of his nose. Calling his wife, he asked her if she had any court plaster. "You will find some in my sewing basket," she said. The elder soon had the cut covered. In taking up the collection at church he noticed that everyone smiled as he passed the plate. Very much annoyed, he asked one of his assistants if there was anything wrong with his appearance. "I should say there is," said the man. "What is that upon your nose?" "Court plaster," said the elder. "No," said his friend, "it is the label from a spool of thread. It says: 'Warranted two hundred yards long.'"

A rather interesting and serious case has transpired at Stavelly, where two U.S. automobiles came into a head-on smash at a detour curve that was insufficiently marked. Both cars were considerably smashed, the damage being estimated at least one thousand dollars, while several of the occupants have been admitted to hospital or are under medical treatment. An investigation has been instituted by Sgt. Hudson and the town council of Stavelly has engaged Mr. Ballachy, of High River, to represent the town. Gross negligence on the part of someone responsible is apparent.

SOCIETY STELLA DITALIA

A branch of the above society was organized at Coleman recently with the following officers: venerable, Mrs. Anita Oliva; assist. venerable, Mrs. Adelina Galli; oratrice, Mrs. Gullia Gentile; sec'y are, Mrs. Ida Fontana; treasurer, Mrs. Inez Toppiano; 1st curatrice, Mrs. Angela DeCecco; 2nd curatrice, Mrs. Antonietta Castellano; 3rd curatrice, Mrs. Rosa Mallo; 1st cerimoniera, Mrs. Berta Mallo; 2nd cerimoniera, Mrs. Cristina Montalbetti; guardia interna, Mrs. Cecilia Timaldi; guardia externa, Mrs. Lucia Squarcella.

DAVIS—FRICKETTON

The marriage was solemnized at the United church manse on Saturday last of Miss Grace Gray Fricketton to Mr. John Winston Davis, both of Bellevue, Rev. J. W. Smith officiating. The young couple will reside in Bellevue.

No wonder the babies have all started yelling. Herbert Hoover refuses to kiss them any more.

FOR SALE—Ford Touring Car, in good running condition, with five good tires and tubes, self starter, speedometer and dry timer, \$125.00. Apply to The Enterprise.

Offers among others, the following Courses:

Through its FACULTY OF ARTS and SCIENCE, courses leading to the degrees of B.A. and B.Sc. (Hons.) in the following fields: English, History, Philosophy, Political Science, Economics, Law, Education, and Music.

Through its FACULTY OF MEDICINE, courses leading to the degrees of M.D. and B.Sc. (Hons.) in the following fields: Medicine, Surgery, Obstetrics, and Gynecology.

Through its FACULTY OF AGRICULTURE AND HOME ECONOMICS, courses leading to the degrees of B.S.A. and B.S. (Hons.) in the following fields: Agriculture, Home Economics, and Food Science.

Through its FACULTY OF LAW, an affiliated institution, a course leading to the degree of LL.B. For terms of admission, details of courses and other information, apply to W. J. SPENCE, Registrar, University of Manitoba, Winnipeg.

WORLD HAPPENINGS
BRIEFLY TOLD

Sir Harold Macintosh, of London, Eng., was elected president of the World's Sunday School Association at their convention at Los Angeles.

Elsan-Paul Landberg, who rescued General Umberto Nobile, has been awarded a medal and promoted to the rank of Captain in the Royal Swedish Flying Corps.

Australia has again entered the London market as a borrower, this time seeking a \$35,000,000 loan which will be used for settling migrants from Britain.

A new weather bureau is to be established on the Quebec citadel, it is announced by Mr. Patterson, assistant director of the Toronto meteorological service.

The Austrian golden cross, highest decoration of the republic, has been conferred upon Captain Herman Koehl, pilot of the trans-Atlantic monoplane Bremen.

The first broadcast of a concert in English waters took place in 1907, according to information recently released from the confidential files of the British Admiralty.

Working men—and women of Illinois own 18 per cent. of all stock in Illinois corporations, it has been announced by James D. Cunningham, president of the Illinois Manufacturers' Association.

Belgium has proposed appointment of Charles Ryans Eucher to the national Hague Court to fill the vacancy created by the resignation of John Bassett Moore, the American representative.

Peking rickshaw-coolies have organized a union to fight the pest of nag-motoring, and to provide a better service to the city's suburbs. The coolies declare that hundreds of their number are now entirely without a means of subsistence because people prefer to ride in buses.

The air pilot's license held by Duke Schiller, a flier for the Trans-continental Airways, has been suspended for six months. Schiller was held responsible for a recent flying accident at St. Hubert's, near Montreal. Suspension of the license has followed an inquiry.

Ask That Anniversary
Be Especially Noted

War Veterans Urge Observance of Tenth Anniversary Day

Particular commemoration of Armistice Day this year, Sunday, November 11, as being the tenth anniversary of the Armistice, is urged by the Amputations Association of the Great War. A resolution adopted by them says: "It is respectfully suggested through the agency of the Dominion authorities that provincial and municipal bodies be requested to ask all citizens to hold this day sacred and pay tribute in such manner as the populace in general unitedly gather in hallowed memory of the fallen."

Pure Bred Steep

One hundred and seven thousand six hundred and five pedigrees of pure bred live stock were issued in Canada during 1927 by the Canadian National Live Stock Records Association, which has a membership of 15,111 breeders distributed throughout Canada.

The befrass ought to make a capital wife.

KEEP HANDY.

Keep a bottle of Minard's handy. It is a universal remedy.

Good Type Of Settlers
C.N.R. Placing Many Families
Through Their Land Settlement

During the first six months of this year, Canadian National Railways have, through their land settlement association, placed 1,338 farming families on 243,272 acres of land along the line of the company between the Great Lakes and the Pacific Coast, according to J. S. McGowan, Western Manager of the Colonization Department, and F. J. Freer, Superintendent of Land Settlement for the company. The figures represent a substantial increase over the corresponding period of 1927.

Thetype of settlers has been chiefly British, American and Northern European stock. Under the land settlement plan of the Canadian National Railways, it has been necessary for the company to bring sufficient capital to enable them to make a start on farms of their own, and the amount of such capital brought in by these people this year is estimated to be approximately a million dollars. Settlement has taken place principally in the less developed districts in the northern parts of Manitoba, Saskatchewan, and Alberta where the land can either be homesteaded or where partially improved farms can be had on easy terms.

Statistics for the present year show an increase of more than 2,000,000 acres sown to field crops. This increase is due to the large amount of new land placed under cultivation last year, and to the stimulus supplied by new land settlement.

Best Advertising Medium

Sir Harold Macintosh, of the coffee firm, declared at the dinner of the Incorporated Society of British Advertisers: "A business is known by its advertising, and if there is anything in which it is important to be earnest it is in advertising. Humor is a necessary ingredient, so long as you get the public laughing with you and not at you. I always believe that the best is the best form of publicity."

The good luck of their friends worries some people more than anything else.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

Continued.

In the evening, as guests of the Danish Government, at a performance of Faust, in the Royal Opera House, we renewed our acquaintance with Mr. Arlington Drake, whom we shall remember, not only as the worthy representative of the British Foreign Office in Denmark, but as a friend of Canada and the Canadian Farmers' Party. Sitting with us, Mr. Drake, who had been in the company of the tour for some time, who were not familiar with the great work. During the evening, he was honored by the appearance in the Royal Box of King Christian, a gracious courtesy which was acknowledged by representatives of the party calling at the palace to sign the Royal book, which is the Danish equivalent of our Canadian custom of leaving cards. The next day the King, Mr. Drake, and the Canadian Farmers' Party, with a party of 10, left for Copenhagen, as follows: "Please thank the Canadians for their visit to the Queen and me. We hope they will find a pleasant remembrance of their stay in Denmark."

Before leaving Copenhagen on our tour to England, we had two important calls to make at the Koller Koller Red Danish Cattle breeding farm, and the Daastrup Landrace pig breeding station.

The Koller Koller farm, owned by 800 Zealanders, has been responsible for many interesting and successful breeding experiments. The herd of 70 pure bred Danish Milchsows, which we inspected, was of remarkable uniformity and noteworthy for their high butter fat test and their copious milk and spring of rib.

On leaving the farm the party received a surprise invitation to visit on van der Neergaard to visit his home and farm, an experience which was much enjoyed. The farm is a large acreage, was able to show the party a beautiful estate and a particularly fine herd of cattle.

The visit to the Landrace pig breeding establishment revealed something of the character of the remarkable uniformity which characterizes the Danish hog. Here it was found that the pure bred hogs were obtained by crossing the pure Yorkshire sire with the Landrace pig, a hardy native breed which is in itself rather coarse and lacks the more desirable for bacon. Today breeding centres are maintained in different parts of the country, some for Yorkshires, and others for the Landrace from which the Danish farmer is able to buy pure bred of both breeds for crossing purposes. The Daastrup station which we visited is the oldest, largest and best in Denmark.

Back in Esbjerg, we were introduced to one of the most remarkable achievements of the Danes. The loss of so much valuable territory to the Germans, in 1864, gave Denmark the choice, of emigration or an attempt to reclaim to agriculture on a large scale vast stretches of practically uninhabited country. These were the sandy wastes along the West coast of Jutland, where 60 miles inland no human habitation was visible. Such of the land as was not gorse and heather.

The Danes bent their energies to the latter course, with the result that today there are 350,000 acres in pine forest and 1,200,000 acres, nearly two-thirds of the total original heath, have been reclaimed by tree planting.

Time did not permit us to visit the older plantations, but a trip to one of the ten to fifteen year-old plantations outside Esbjerg, was with amazement. A sandy, wind-swept, barren, poor plain there had been turned into a productive, fertile, green country, thousands of acres, of which are pasture land, capable of supporting a fair live-stock population.

A trip to Ribe, the oldest town in Denmark, and a narrow street, and then a farewell on behalf of the citizens of Esbjerg, completed our stay in Denmark, a gala! In the country which we left behind us, our sincere appreciation was telegraphed to the Prime Minister and through him to the people of Denmark.

We also telegraphed our thanks to the British Minister in Affairs, who had proved himself not only a worthy representative of the British Empire, but had become almost a comrade.

Little need be said of the return voyage across the North Sea except that for the first time, there was a reduced attendance at the dining table.

London again! No place like London! After all, it was good to hear around us our mother tongue, even if spoken with a different accent. Our first morning was spent at leisure, but in the afternoon we were to pay the honour of a visit to the King and Queen, and tea at Buckingham Palace. If we had felt some trepidation, it would have been excusable, but how little need for any such feeling. The shyest person would have been put at ease by the kindness of the King, the graciousness of the Queen, Her Majesty had been indisposed for several days, and the Royal party had only returned less than an hour before from Sandringham, nevertheless, we were presented to her twenty-seven years ago when she visited Canada as the Duchess of York. Her Majesty was thoroughly interested in the Danish tour and asked many questions about it. This visit to the King and Queen in a tour already rich in privileges accorded.

Our next engagement brought us to a sphere in which we were the experts. This was our visit at our

The London Hunt and Country Club is widely known for the excellence of its afternoon teas. For several years this progressive club has used no other tea but Red Kona Orange Pekoe. A blend that lends all others in flavor and full-bodied richness. Put up only in bright, clean aluminum packages. 185W

Brandon, Suffolk, to the Ministry of Labor's Training Farm for Overseas Settlement, when we were asked frankly to give our impressions of what was being done to transform groups of unemployed young men into farm workers for Canada. Here on the beautiful Westing Hall Estate was the most interesting and the most hopeful experiment we had seen. One of the biggest problems which are Britain's legacy of the war, and of post-war conditions, is that of knowledge, but it is the one, embodied, willing young men for whom there is no employment and for whom the training is the use of the but the "dole" which it should be explained is not a charity, as is so often believed in Canada, but is an employment insurance. The Ministry of Labor is now training a number of the ways out. Young men desiring to settle in the Dominions, are given a preliminary training suited to the particular Dominion to which they hope to go. Others are given training which will fit them for new occupations in the Old Country. The group which we visited was being trained for Canadian farming. With Canadian implements, they were being taught, by men with Canadian experience, hitching, harnessing, ploughing, mowing, the use of the and of such tools as are employed in general handwork.

(To Be Continued.)

Canada Colonization Association

Hope To Place 3,000 Families On Land This Year

The Canada Colonization Association hopes to record this year the placing of 3,000 families on privately owned farm lands in Canada. It is now within about 300 of this figure, according to T. O. F. Herzer, manager of the subsidiary of the Canadian Pacific's Department of Colonization and Development. Since its inception on January 1st, 1925, the Association has placed 2,679 families on 650,357 acres; this year's contribution to the end of May, being 235 families settled on 64,114 acres. With Ontario now being included in the circuit of the Association's activities, the placements for the present year, up to May 31st, run as follows: Ontario, 71 families placed on 2,611 acres; Manitoba, 54 families on 14,283 acres; Saskatchewan, 97 families on 20,132 acres; Alberta, 88 families on 25,652 acres; and British Columbia, 25 families on 1,336 acres.

Homestead Entries

996 Homesteads Taken Up In Four Western Provinces During May

Homestead entries for Dominion lands granted by the four western provinces during May, totalled 996, as compared with 840 for the same month last year. By provinces, Manitoba recorded 44, as against 71 for May, 1927; Saskatchewan, 268, as against 287; Alberta, 317, as against 285; and British Columbia, 79, as against 17. For the five months of the current year entries totalled 3,885, as compared with 2,168 for the smaller period of 1927. By provinces, Manitoba recorded 207, as against 253; Saskatchewan, 1,221, as against 1,038; Alberta, 2,249, as against 840; and British Columbia, 208, as against 37.

Extending Air Service Westward

Contracts As Far As Winnipeg Planned For Next Year

A gradual extension of the air mail services now successfully operating in the east to the west is contemplated by the Post Office Department.

Flyers have started out to determine the best route for a service between Montreal and Winnipeg and whether aeroplanes or hydroplanes are the best adapted to the service.

Contracts as far as Winnipeg are planned for next year and the department has in view later an extension of this service across the prairies although to that end no definite steps will be taken for a while.

To Honor War Heroes

Hungary is to honor its war dead with a monument which will be dedicated to the memory of the fallen and at the same time will express her desire to Hungary to be reunited some day. The 1,000-year-old country will be typified by a single, huge, unadorned stone. On the stone will be chiselled the figures 10-1918 and 658-000—the number of Hungary's war dead. There will be no other inscription. The monument will be erected in Budapest before the Millennium monument.

One Hundred Years Hence

British Scientist Has Ideas About Conditions In Next Century

Dr. E. R. Fournier D'Albe, the British scientist, has created a mild sensation with his lecture on the future of women and their dress. Dress materials will be made exclusively of cotton a hundred years hence, he said, but it will be cotton glorified beyond recognition by chemical treatment, such as has already been supplied with artificial silk.

Linen will have disappeared, killed by the advent of nitro-cellulose paint and the disappearance of linseed oil. Materials will be made to combine the strength of calico with the transparency of chiffon, and the softness of tulle. Fur, swimming and other sports costumes will be made of paper or will, perhaps, be sprayed on the skin to make a perfect fit. Several methods of doing so are already known to chemistry.

A revolution in the service of the servant will be forgotten because the servant will be no more. Wireleg will be compulsory in every household and universal. The compulsion will be of the same nature as that which forces every citizen to read a newspaper these days. Houses will not be built of brick, but of glass, or else of some other transparent material so that when occasion arises it will be possible to light up the house with all the daylight available. The garden of the next century will be a wonder and a joy. The mastery of man over the vegetable kingdom will be so advanced that it will be open to everyone to grow gorgeous flowers and new kinds of fruit.

Has Many Valued Curios

Coins and Books Make Collection Of Edmonton Woman Varied

The collecting of old coins is a hobby that perhaps not many women indulge in, but Mrs. E. Q. Chase, of Edmonton, has a varied and valuable collection, as well as some very interesting and rare old books. Among her coins are included two Roman coins of the reign of Augustus, Romanus Pater; a New Brunswick halfpenny of 1811; a United States copper of 1842; and copper of George IV. reign.

Mrs. Chase also has a copy of the London Times, November 7, 1895, with an account of the battle of Trafalgar and the death of Lord Nelson. Another possession of Mrs. Chase is a miniature history of England from the time of William the Conqueror to the coronation of Edward VII., in 1901. It is only one inch thick and contains over 700 pages. "The Chimes," by Charles Dickens, printed in a book one inch by one and one-half, is also a valued possession. A frontispiece shows the new House of Parliament at that time.

The man who never has any trials and tribulations is unable to appreciate happiness.

CHAPTER XXVIII.—Continued.

Helmi slept the sleep of utter exhaustion, for when she awakened the gray dawn was showing at the mouth of the cave. She looked around for the dog, but she was gone. The pain in her breasts was like a thousand knives twisting and torturing her, and a cry of utter anguish broke from her lips.

Then she remembered the horror of the night before, the terrible deed she had done. She saw again that face of fright and heard the scream.

She went to the mouth of the cave and saw below her the river, running so fair and peaceful and serene. The early morning light, platinum gray, was lying gently on the river's bosom, from which soft little veils of mist were ascending. Helmi shrank back from it in fright, remembering the man who had buried his troubles in its treacherous depths. She clung to the side of the cave pleading with the river not to tempt her. Watching its current she seemed to see Jack's face again, sliding away from her. Then came little Lilla's face, cool and peaceful and smiling, with no more fever or pain, and an irresistible impulse to kiss her burning, tortured breasts. In the quiet green waters of the river drove her forward.

For one brittle moment she swayed toward the stream. Then something bounded against her, throwing her backward to the grass, and her friend of the night before was beside her, whimpering, whimpering, with a tenderness that Helmi knew, for it spoke a universal language. She crawled back in the cave, wide awake now, but writhing in her misery. Then came Cleo, the dog, with something in her mouth which she laid in Helmi's arms—a little furry, cuddly puppy, with a fat little body and cool, soft, eager, questioning lips.

FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound because it has changed my life. It helps me and I cannot praise it too highly. I was troubled with heat flashes and my limbs were heavy so I could hardly walk to do my farm work. I saw in the newspapers an advertisement about this Vegetable Compound and thought to give it a trial. The first bottle gave me relief and I have told others what it has done for me. I am willing for you to see my letter if you choose."—Mrs. D. B. Fennell, Wilton, Ontario. Ask Your Neighbor

W. N. 11, 1748

is yours. You and I will never part, and your pups are welcome, too. Come on." Cleo came in, with a pup in her mouth, smiling as broadly as she could without altogether dropping the pup.

The dog's hunger was pathetic. All the more because it tried so hard not to appear ravenous. This was evidently her first good meal for several days. The puppies, tired out by their adventurous night, were soon fast asleep in a box in which Helmi had placed an old coat of Jack's, and in which they curled up into an indistinguishable mass of fur and wool, with only the little round head showing.

When Cleo had eaten her breakfast she stood at attention, her eyes fixed on Helmi's face, as if she were trying to read her mind.

Helmi patted the dog's head. "Take a sleep, Cleo," she said, kindly; "when I get my house cleaned up and my clothes dried I will tell you all my plans. I do not know where we are going to live, you and I and our families, but I know we are going to live together. I heard many times in the city that no one wanted a girl with a baby, so I suppose a girl with a baby and a dog and three pups is not wanted either. But still I have faith in God, Cleo—He always helps. Now lie down and be happy we have enough here for a few days."

Life had changed for Helmi. The demon of revenge which had embittered her heart had been laid to rest by the hand of God, her friend. Her simple theology God had actually reached down His hand through the blackness of the storm and struck the magistrate dead because he had brought such evil upon her, and to prevent her from committing the crime of murder. God would be her friend for evermore; she would trust Him now whatever came. She had now no more fears for her baby. Lilla was in God's keeping—God and the brown-eyed nurse who had spoken so kindly to her.

After a couple of hours of vigorous work Helmi had her house spicily again. Then she lay down to sleep, for a delicious weariness had come over her, and with it a sense of security and peace such as she had never known in all her life before. "Home and God," she murmured to herself drowsily. "Now I can sleep."

It was the middle of the afternoon when Helmi awakened. Cleo was sitting beside her, watching her. The pups were still sleeping. She sat up, shaking out her head and hair. The fire had died down but the house was pleasantly warm.

Outdoors the sun shone brilliantly, and Helmi went out to inhale the delectable odors of spring. How she had missed this in the city! But here it was as poignantly sweet as ever. The wind from the river brought to her the medicinal tang of the Balm of Gilead, pungent and healing, and Helmi's heart responded in a thrill of love, for she remembered the salve her mother used to make of the buds, boiled with clean white lard on the stove, strained through a white cloth and put away in little glass pots for use all the year. As she breathed in the odor reminiscent, from the woods behind the station came the liquid notes of the meadow lark.

(To Be Continued.)

Might Be Good Idea

Germany Has Suggestion For Checking Reckless Motorist

To check the activities of motorists who travel at reckless speeds, it is suggested in Germany that all drivers should be compelled to install a device that makes a red light glow as soon as the legal speed limit is exceeded.

This idea has apparently followed an invention of a German engineer, who devised a radiator cap light to warn pedestrians at night of the speed at which a car is approaching. Several lights are arranged as a radiator ornament, and for each ten-mile-an-hour increase in speed a different light flashes. At sixty miles a red light glows as a warning signal.

Work Horses Eat Most

How much does it or should it cost the farmer to feed his horses for a year? The answer is found in the report of W. H. Gibson, B.S.A., superintendent of the Indian Head Experimental Farm, for the year 1927. The figures follow: Brood mares, \$45.45; work horses, \$76.04; three-year-old (working), \$49.91; two-year-olds, \$36.11; two-year-old stallions, \$77.85; yearling stallions, \$46.50.

New Farmers For Saskatchewan. New farmers to the number of 1,873 were added to Saskatchewan's population during the past year and 1,464 new farms were taken up, according to Evan's Statistical Service. The province's greatest increase was registered from the northeastern portion from Humboldt to Melville, and east to the Manitoba line.

Another Television Test

Demonstration In New York Shows Big Advance Made

The day when radio owners can tune in on sporting events and other happenings of interest and see them instead of merely hearing an announcer's description, has moved one step closer.

The Bell Telephone laboratories demonstrated their improved sunlight television apparatus which showed several full length figures as they moved about an area roughly the size of a boxing ring. The action was shown in perfect detail on a screen about two inches by three.

The television images were as clear as the average movie and were marred only by an appearance of being under a paper thin sheet of water moving slowly upward across the picture. This defect, engineers believe can be eliminated.

The new television was developed by Frank Gray and Dr. Herbert E. Ives of the Bell laboratories.

Discouraging Swarming

Method That Has Proven To Be Very Satisfactory

A method tending to discourage swarming has been tried with success at the Charlottetown Experimental Station of the Dominion Department of Agriculture. The plan is to add a shallow super of drawn comb immediately there is evidence of swarming. Being given increased room the bees were found usually to settle down and start building queen cells in this new and less crowded area of the hive. In due time it was found necessary to inspect the hive and to watch for and destroy any new queen cells discovered. The superintendent of the station in his 1927 report states that this method has proved very satisfactory over several seasons.

Fresh Supplies In Demand.

Whereas Dr. Thomas' Electric Oil has been introduced increased supplies have been ordered, showing that this never fails excellent Oil impresses its power on the people. No matter in what latitude it may be found this oil is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

Makes Mineral Discovery

Woman Finds Copper Pyrite In Northern Manitoba Field

For the first time in the history of Northern Manitoba, a woman has made a mineral discovery of major importance.

Miss Kathleen Rice, graduate of the University of Toronto, and well known by prospectors in the northern mining field, is the fortunate woman, and according to those who have examined the sample of ore recovered from her cabin, she has made a rich strike.

The find, which is copper pyrite, was made near the northwest shore of Lake Wakuska, on Rice Island, about 1,000 feet in length, 25 miles from steel on the Hudson Bay railway. The island, which has served as a landing place for thousands of prospectors, was known to contain ore, but mining men had doubted its value.

Miss Rice, with another prospector, known as Dick Wooley, has been conducting drilling operations on the property for some time. Yesterday she arrived at The Pas with a sample of ore recovered, which geologists pronounced as "first class" find. The ore was struck about 10 feet below the surface and according to Miss Rice, has been traced along a vein more than 100 feet in width.

A miniature stampede was launched toward the district as soon as knowledge of the strike became general. Miss Rice reported that she had already received offering letters for her claim by several leading Canadian mining interests.

Minard's Lintment binds cuts, bruises, etc.

Little Helps For This Week

"Let all those that put their trust in Thee rejoice; let them also that love Thy name be joyful in Thee."—Psalm v. 11.

I know He is, and what He is, Whose one great purpose is the good.

Of all, I rest my soul on His Immortal love and Fatherhood. And trust Him as His children should.

John Greenleaf Whittier. To know God; to love Him altogether; to live in the light of His countenance; to be satisfied with a little in some directions, because in others we have so much; to receive all things hopefully, because they are from Him; to take the peace of resting in His goodness; to desire all the day long, "Oh that my heart were as Thy heart; and that wholly!"—these are open to us.

—John Hamilton Thorn.

A TIRED-OUT FEELING

Is a Sure Sign That the Blood Is Thin and Watery

"I am glad to have an opportunity of testifying to the benefits I derived from the use of Dr. Williams' Pink Pills," writes Mrs. Lawrence Kennedy, St. Joseph, N.B. She further says: "Some years ago I was a tired-out feeling, had no appetite and suffered terribly from headache. Almost every month I had to remain from the office for a day or two. I was advised to try Dr. Williams' Pink Pills, and I have reason to be glad that I followed this advice. Before I began to feel much better. Continuing their use, my appetite came back. I regained my strength and the terrible headache from which I had been so long oppressed, have been married some years now and have two fine healthy children. A girl a boy, and am in the best of health. All this I owe to Dr. Williams' famous Pink Pills, and I trust that these few lines may help some other weak, run-down person." All weak, run-down people who will give this blood-building tonic a fair trial will find through its use new health and strength. You can get the pills from any dealer in medicines, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

What Could Be Clearer

Naughty little Jimmy had been eating green apples, so his mother had to call in the doctor.

"Now my little man," said the kind doctor, "tell me what you think is the matter with you."

"It's like this, doctor," answered Jimmy from his bed of sickness, "you know how you feel when you don't know how you feel? Well, that's how I feel."

"I see you've given up teaching your wife to drive."

"Yes; we had an accident. I told her to release the clutch and she let go of the steering wheel."

Minard's Lintment for Insect Bites.

Physicians are called upon to prescribe for the imagination more often than anything else.

A young lady seldom tires of trying to convert a bachelor to the annexation theory.

What many people call indigestion, is often merely excess acid in the stomach. The stomach nerves have been overstimulated, and food sour. The corrective is an alkali, which neutralizes acid instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians for 50 years since its invention. One spoonful of this harmless,

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Haskerville Dental Society

THE "GUM BOIL"

Your child has come running to you one day, suffering pain—and has pulled aside his lip to let you see an angry lump on his little jaw. And, since it was just as sore as a boil to touch, you called it a "gum boil."

Or, possibly he had not complained of any soreness then, but one day while scrubbing his teeth, you noticed this lump with a pain opening in the centre, reminding you for all the world of a miniature volcano. And from the "crater" was running a thick yellowish substance, which you knew to be pus.

Now what had caused this? Just one thing—a dead pup.

Nor do you have far to seek for the offender, your dentist usually tells you that the tooth past over this sore is badly decayed or broken down, and must be removed.

Then what should be done? For, of course, this condition should receive prompt treatment.

Should the tooth be not too badly decayed, your dentist usually tells you to try to save it; but more often, it should be extracted after the inflammation has pretty well subsided. Following this treatment, the gum heals over, and you congratulate yourself that no harm has been done. But consider: already serious disturbances may have resulted, in the disease process may have destroyed the permanent tooth germ beneath, to say nothing of the train of evils from the premature extraction of the offending tooth; and from the drainage of the pus into the system during the progress of the disease.

How much better, then, had the tooth been saved, and the system during the early stages of tooth decay.

Canada a Melting Pot

People From Various Countries Contributing To Our Culture

"It is up to us to see to it, that the contributions of the different peoples coming to this country is melted into a composite whole, and we will build up a people that will be equal to the ancestry from which we came," declared Hon. Sam. J. Latta, speaking before a huge gathering of Norwegians in convention at Saskatoon. The gathering took the form of a patriotic meeting. Mr. Latta explained that people from the various countries, and their culture of those countries, and these contributions were all blended together here.

Relieves Asthma At Once. If you consider the thousands of unsolicited letters received by the makers from grateful users, you, too, would realize the remarkable power of Dr. J. D. Kellogg's Asthma Remedy. All cases, incipient and chronic, are cured by this genuine family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

Given Lives Passes On Boats Captain Koch, Major Fitzmaurice, and Baron von Huenefeld, who made the first westward Atlantic flight in the Bremen, were presented with free passes for all the Hamburg-American Line boats for the rest of their lives by Director Boerger, at Hamburg.

We gather from the many articles in the newspapers that the secret of health is still a secret!

When Pain Comes

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You can never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure you get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acid. Each bottle contains full directions—any druggist.

HIKE FOR HEALTH

Automobile laziness is the cause of one hundred times as many deaths annually as are caused by automobile accidents. The automobile has made it possible for us to get through life with hardly any exercise unless we are fortunate enough to be employed in some variety of manual labor. This has completely changed our mode of living, but not our diet; we still eat the same quantities of rich heavy food customary fifty years ago.

Easy and quick transportation at any time by automobile should be one of our chief blessings; to many it appears to be far from that. The medical profession has been aware for some time of the great increase of disease among the well-to-do. This situation has become so marked that our great insurance companies are becoming seriously alarmed. Investigation has shown that fully 90 per cent of the well-to-do of our population have either undergone an operation or are suffering from some kind of disease, and the number of sudden deaths of apparently healthy people is increasing alarmingly.

The blame for all this is placed unhesitatingly upon the thoughtless use of the automobile. To preserve his health man must exercise. The languid game of golf after sitting all day either in his office or automobile has proved but a poor substitute. Many try to replace exercise by bad foods and patent medicines and thereby enrich many charlatans but benefit themselves very little. We are clamoring for larger hospitals and more operating rooms; we would be wiser to clamor for more parks and recreational areas where we may pleasantly indulge in natural exercise.

It has become the fashion among the motoring public to drive through our parks as fast as the law allows and to agitate for extended roads hither and yon so that they may drive further from the beaten path. The motoring public of tomorrow will undoubtedly have different ideals; they will appreciate motor roads located through attractive districts, with numerous parking places from which they may explore on foot the beauties not to be seen from the road. They will be anxious to learn what is behind the hill. Now, the average motorist has but little to tell of his trip except his daily mileage record; then, the subject of his motor trips will be treated by his friends with the discretion now used towards a postage stamp collector. When once started on a description of the trip, photos, mineral specimens and curios of many kinds will be produced, and the story of the trip will be a long one, full of plans for the exploration of other districts in the future.

There is no more delightful nor healthful way to spend a week-end than on a new trail. Popular books, plays and amusements are usually "different." National parks provide something different every few minutes; the scenery, both in relation to light and shade and relative position, is always changing; there is always the lure of the unexpected just round the corner. Many and varied are the objects to interest the observant which will never be noticed by the long-distance hiker who, like the present-day motorist, takes his pleasure from his mileage records. Some of the world's richest mines have been passed unnoticed by hundreds before the man with the seeing eye came along to see, investigate, and become the envy of his less observant fellows.

An elderly dyspeptic was found wandering alone in the mountains of Colorado. He said that during a serious illness he realized that in his lifelong study of the world to come he had seen very little of the world in which he lived. His enjoyment of his surroundings was almost pathetic; he realized too late how much of the beautiful in this life he had missed.

Various foreign governments carefully foster physical culture either in the form of citizens' military training camps, great athletic meets, or Olympic games, in which thousands of athletes annually take part.

Walking has become very popular in many European countries. The German government were quick to grasp the significance of this. They have established shelters at suitable points of interest throughout their country, which were patronized by over twenty million hikers last year. Not only university students to whom a hike was a college week worth weeks of college, but hosts of wage earners from the large cities made up their own parties of from half a dozen to a hundred or more and had a most enjoyable holiday at slight expense.

Obviously the scheme is of national benefit. National health is improved and patriotism fostered by broadening the vision and familiarizing the people with their beloved Fatherland.

The most robust employee usually commands the best wages, but during slack times the weak ones are often discharged, to possibly become a charge on the city. National prosperity is based on national health. Strong robust manhood and womanhood is the foundation on which a strong nation must rest. Canada has much beautiful scenery, especially in the autumn. Why not familiarize ourselves with our own country by walking through it? Why not set aside an annual hiking week, preferably during our Indian summer, and then "let's go" on a hike of thanksgiving for our present health and gather a harvest of health for the future?—Canadian National Parks Bulletin.

WIVES LINGER AT CARDS;
HUSBANDS LEARN COOKING

Fifty husbands and bachelors who are enrolled in a men's cooking class at Battle Creek, Michigan, are enthusiastic over the idea. So are their wives, who like to linger longer over their bridge tables. Girls, however, who believe in the old saying that the way to a man's heart is through his stomach, are somewhat doubtful.

Miss Frances Louder, a dietetics graduate of Columbia university, conducts the class. She declares the plan is not meant to encourage bach-

elohood by making men independent of marrying to get a good cook. It is rather that wives will feel at liberty to take an occasional afternoon off and still not leave the man of the house hungry and disconsolate. Also, better meals on camping trips will be assured.

The class, sponsored by a gas company, opened with an enrolment of twenty-two men. Now fifty-five men are on hand for each lesson and applications are still coming in. Tasty meals are prepared every Wednesday night when the classes are held, and at the close of each session the men eat what they have prepared.

Bankers, lawyers, factory executives, post office clerks, salesmen, store managers and doctors are included on the class roll. Each student is assigned to certain tasks during the preparation of each meal, following the instructions of the teacher. Printed directions are given each student at the close of the sessions, and these are preserved by the men in handy leather covered folders which are given to all who pledge to attend every class. If business interferes, however, they are excused by the teacher.

The instructor found that a few of her students had more than a vague idea that "balance" could be applied to anything so far removed from a business account as a meal. However, she is satisfied with the progress her pupils are making, and expects to turn out some really expert male cooks before the course is completed.

The class "studies" in a model kitchen, the furnishings of which include a modern stove with heat regulator, iceless refrigerator, service tables, kitchen cabinet and other devices.

"All the men seem to enjoy their lessons," Miss Louder declares. "In fact, they don't seem to care to leave when their lessons are completed. However, I have found a sure-fire way of getting rid of them when I want them to leave—I start washing dishes."

SIXTH FORTNIGHTLY
CROP REPORT

(Issued by Department of Agriculture, Government of Alberta, Edmonton, July 21, 1929)

Seventy-five to eighty per cent of the wheat crop throughout the province is in head and all grain crops continue to make rapid growth, according to telegraphic reports received by the department of agriculture on Friday, for the sixth fortnightly crop report of the season.

Practically all sections of the province have benefited from intermittent showers during the past two weeks and moisture conditions are generally reported as highly satis-

factory. Only in very few districts have low lying lands suffered from the rainfall, which has been well in excess of the average for July. Hot, dry weather would be beneficial now in some sections where early-sown wheat is approaching the filling stage. Oats and barley are making vigorous growth and these crops on early land are starting to head.

Conditions continue ideal for breaking, and particularly through the central and northern sections of the province, large areas of new land are being cleared and brought under cultivation in readiness for next year's crop. In some localities summer-fallowing has been hampered to some extent by the excessive moisture in the soil, and the same difficulty is reported in connection with the cultivation of the beet crop in the south. Haying is well advanced in southern sections. A good crop of alfalfa and other cultivated hay is being cut and continued dry weather, is essential to ensure proper curing.

Some hail damage to crop is reported but this is confined to very limited areas. Crops this season have been particularly free from insect and disease injury.

With prospects of a very satisfactory crop, harvesting is expected to start a few days earlier than in 1927 in the Peace River country, where the grain acreage is considerably in excess of that of last year, and harvesting throughout the province will commence about the third week in August.

DID YOU EVER STOP TO THINK

(By Edson R. Waite, Shawnee, Oklahoma)

A. M. Belding, editor-in-chief of the Saint John, N.B., (Canada) Telegraph-Journal and Evening Times-Globe, says: That the modern newspaper is the greatest agency for community building. The latter term is to be interpreted in its broader sense. The newspaper keeps every citizen informed concerning every movement in his own city, whether it relates to the material, mental or spiritual realm. From it he gets not only knowledge but inspiration, and suggestions not merely regarding material things which may be turned to his profit but opportunities which are offered him to render that helpful human service in one branch or another of social activity which will make his town a better one in which to live, and therefore a better location for his own business and his own home.

Recognition of the value of the newspaper is found in the fact that people invariably solicit its aid to forward a worthy cause, while those promoting causes which are unworthy are even more determined in their efforts to persuade the people

Hunting Army to Invade North Woods

THE SHOOTING STARS

The enormous increase in the sport of deer hunting has resulted not in the vanishing of the deer but in the increase of deer. This is not as mysterious as it sounds. The more men penetrate the wilds the fewer wolves remain. The driving out of wolves has been the greatest factor in the increase of deer. But there is another factor almost as important as the wolves. The invasion of the backwoods by an army of enlightened sportsmen has demanded a much stricter and more sporting regard for game laws than was the custom some years ago. Destroyers of deer whether human or animal, have to deal with a strong and more or less organized public opinion.

Good Hunting News
Hunting news has been coming in daily to the offices of the general game department of the Canadian Pacific Railway Company from operators of camps, guides, outdoorsmen and others who report that all signs point to an unusually promising hunting season for the current year.

Mike Bates sends down word from his camp at Metagama, Ontario, that if the hunters don't get their deer and moose this season they'll have nothing to blame but their poor shooting. He says that moose are very plentiful and expects it to be a great year in every way.

From Schreiber Ontario where John Handel, outfitter has been operating the reports are just as reassuring. Handel reports that the game has increased in the Superior Game Re-

CALLING THE MOOSE

serve, south of the C.P.R. line and the surplus has crossed to the north of the tracks offering good hunting. He says that caribou are roaming the woods in increased numbers, and as the C.P.R. line is the north boundary of the game preserve hunters don't have to go very far for their quarry. The news from Sheehan's camp at Lake Penase south west of Sudbury is also music to the hunters ears. Deer here are reported to be very plentiful and sport should be excellent.

Reports turned in by guides of the Ogilvie Bros Camps on the Tobique River, N.B. are to the effect that deer, though very plentiful just season, show signs of much greater increase. The same word comes from A. D. Thomas, at South Milford in the Kedgemaquoog district.

Lining Sights.
Should you follow the deer with your sights or set your sights ahead of the deer and let him come on them?

Well, the army training which men get overseas taught them to consider the second system the better. Lewis gunners firing on moving targets were taught to throw a burst ahead of the mark, to see where it struck, and then let the target move onto the line of fire. Trying to follow a jumping deer in all its excited movements is harder, probably, than trying to guess a spot that the deer will pass say an opening in the brush on which to have time to lay your sights sharp and true. For casual shooters to get a little practice with their rifles a method of letting the deer run on sights already set is regarded as the most successful.

Brot Albanach

1. Pretty little Kathie Kemp dancing the highland fling at the Highland festival.
2. The Banff Springs Hotel that will become a veritable seasonal hall during the forthcoming Scottish gathering. The new swimming pool is glimpsed below the hotel.

Brot Albanach appeared on the menu of the "Frith Neoin" Bladh bladh air a bhord; air an 2mh lath de'n Naidheachd Mìos, and if any of those who attended the Highland Gathering and Scottish Music Festival at Banff last year could read that far, they know that "Gruthan lagh le bhraichte, agus mionell slànichte," was nothing more formidable than broiled calves liver with bacon. If they ordered it, they will probably go back for more.

The Highland Gathering was a great success last year. This year, between August 31 and September 3, it will be repeated. Banff will be Scotland for a week. Pipes will stir through the forests and hills; the tartan will colour the trail; and there will be dancing, highland dancing, and

dance contests,—and Caledonia games, tossing the caber, and putting the shot. And in the evenings, music—Scottish music—with famous singers as interpreters. For the first time in Canada,—for the first time in nearly a hundred years anywhere, Burn's Cantata "The Jolly Beggar," will be presented.— Gaelic, and the songs of the Lowland Scots; and on Sunday, at Sun Dance Canyon, a service in the open air. The old Covenant tunes will be heard among the hills, and the pipe will play the minister to his pulpit.

Paintings and Pageantry.—His Royal Highness the Prince of Wales has once more graciously given his patronage to the Banff Highland gathering.

human experience. It is, moreover, a great educator, and he who thoughtfully peruses his newspaper is invariably well-informed. He is the better qualified to be himself an intelligent factor in community building.

Greatest advance in motoring comfort since balloon tires...

STUDEBAKER'S Ball Bearing Spring "Shackles"

FREEDOM of spring action never before achieved—yet undeviating uniformity—no sideways—absolute elimination of squeaks and rattles—lubricant for upwards of 20,000 miles sealed in each of the 12 spring shackles—a vast advance over any other system of chassis lubrication.

Come ride in a new Studebaker today. Enjoy its unique comfort over the roughest stretch you know. See rare new beauty of line and color. Then compare Studebaker's new low One-Profitee prices!

At last... ball bearing spring shackles... the secret of the remarkable riding comfort of the new Studebakers.

A fellow named Campbell has married a girl named Calendar at Drumheller. Now watch little dates fly.

The only BIG DANCE of the season at Beaver Mines, will be held Friday night, July 27th. Alternatt orchestra.

A man aged eighty-four and a woman aged sixty-nine recently fell in love and got married at Bawlf. Another happy life ended.

The difference between a politician and a statesman is: the former thinks of the next election, the latter of the next generation.

Here and There

(58)
With concrete now up as far as the first bedroom windows and steel up to the fourth, the Royal York C. P. R. monster hotel in Toronto is well up to schedule and is expected to be completed in time for the opening next May, notwithstanding the short strike of the steel and building trades.

W. M. Van Valkenburg, president of the Regina Board of Trade, says that his city and province are out to capture industries. That is one reason for his visit to Montreal and the Eastern States. He figures that the mineral resources of the province should provide the basis of a number of industries, as 42 per cent of the provincial area lies within the pre-Cambrian shield.

Inauguration of the new New York-Yarmouth, Nova Scotia, passenger ship service recently represented the first entrance of a vessel from New York into Yarmouth harbor for the past 20 years. This was the S.S. Evangeline, of the Eastern Steamship Line, carrying 150 passengers. She is of 5,000 tons and her sailing connects with the Dominion Atlantic Railway and so enables tourists to reach Nova Scotia sea and holiday resorts.

This summer will witness a great deal of activity on the part of the grain companies as well as the Wheat Pool in the construction of elevators at country points in Alberta to take care of the larger harvests which are expected. Another company which has just announced its intention to enter on a construction program is the Gillespie Grain Company. According to John Gillespie, president, the firm plans to erect six new elevators each with a capacity of 40,000 bushels.

Musicians under the leadership of Flight Lieutenant John A. Amers, forming the band of the Royal Air Force, Britain's youngest military band, landed recently at Quebec from Canadian Pacific liner Montclair, for a tour of Canada from coast to coast, as did the band of the Coldstream Guards last year. This aggregation was formed in June, 1920, and since then has fulfilled completely all over the British Isles. The band will play in all the principal centres, military centres and garrison towns of Canada during their tour here.

"First call for dinner!" "Last call for dinner!" The old monotonous warning to the hungry traveler is a thing of the past on the Trans-Canada Limited, C. P. R. Trans-continental car trails from Montreal to Vancouver. To-day a nattily attired waiter in white coat and apron with a smart black bow tie walks through the cars ringing "chimes" on a dulcimer, an appeal at once more pleasant to the ear and more likely to attract attention than the former method. In time, there is no doubt, the idea will be adopted on all dining car trains of the railway.

Advertised to make the trip from Montreal to London in nine days, the Canadian Pacific freight ship Beaverbrook actually completed the run in eight days and twenty hours, making record time for a freight vessel between the two ports. This ship is one of the five "Beaver" ships making up the new fast freight steamship service of the Canadian Pacific. They have refrigerated cargo space and are of 10,000 tons dead weight. The service is between Montreal and London, and there is a sailing from the Canadian port every Friday, the vessels as a rule making better time than most passenger vessels on the London route.

Around ten thousand snowshoers and their friends will visit Montreal on the occasion of the 20th anniversary of the founding of the Canadian Snowshoers' Association to be held in Montreal February 3-6. The convention is international in scope and it is expected that the American Snowshoers' Association with over 1,500 members in the states of New Hampshire and Massachusetts, while there are also representatives from the Manitoba Snowshoers' Association and local bodies from all over the province of Quebec.

Making his second visit to Canada in 44 years, Seymour Hicks, noted British actor, with his wife, the equally well-known English stage favorite, Eilaine Terras, and their daughter Betty, with a company of 26, arrived at Halifax this month, played a week there and three days at Saint John as the opening phase of a four months' tour that will embrace the whole Dominion to Victoria and back. Mr. Hicks travelled C.P.R. and will conclude his tour May 5.

The increased buying power of the Canadian people and the surplus funds in their possession for investment in the last few years is accounted for by the increased production of the Dominion, substantial increments having been recorded since 1923 and a new record made, according to estimates, in 1927. The value of gross production in Canada in 1923 was \$4,246,000,000; in 1924 was \$5,253,000,000; in 1925 \$5,599,000,000; in 1926 \$5,658,241,824, and in 1927, according to the estimate of the "Financial Post," \$5,755,796,700. Production in 1927 exceeded that of 1926 by approximately \$100,000,000 and that of 1925 by \$909,000,000. Agriculture accounted for \$1,860,391,100; forestry \$439,405,000; fishing \$29,291,000; trapping \$18,788,600; mining \$282,753,000; electric power \$108,195,000; construction \$208,200,000, and manufactures \$2,760,700,000.

WHAT A DIFFERENCE REAL COMFORT 'MAKES'

HAVE you ever tried sitting bolt-upright in a hard, high-backed chair—and then noticed the difference when you changed to the deep, soft, comfortable arm-chair you love so well?

This comparison gives you some idea of the enjoyment you'll get from Oldsmobile riding comfort. You'll notice it first when you settle yourself comfortably into the deep-cushioned, form-fitting seat and stretch out your legs in its roomy interior.

You'll be still more deeply impressed when you take a drive and discover how its four Lovejoy hydraulic shock absorbers transform even the roughest roads into smooth-riding boulevards. And you'll appreciate the complete restfulness—the final touch of fine-car luxury—which results from a rubber-cushioned chassis, a silenced interior and a new vibrationless 55-h.p. high-compression engine. Come drive the car that luxuries are buying. Know the beauty—the luxury—the brilliant performance of the Fine Car of Low Price. Find out what a difference real comfort makes!

Showing Canada her Opportunity in World Trade

Another Striking Advertisement
by the Trade and Commerce
Department, Ottawa

The various striking advertisements of the Trade and Commerce Department at Ottawa which have appeared in Canadian newspapers from time to time are calculated to create an "export trade consciousness" throughout the Dominion.

It was decided last year by the Honourable James Malcolm, Minister of the Department in question, that Canadians should become more intimately acquainted with business opportunities outside their own country. In order to accomplish this, the campaign of publicity was embarked upon.

Canada's external trade has grown in such proportions as probably few Canadians

The Empire Opportunity in Manufactured Goods

Of 38 groups of manufactured goods Canada sells the Empire to the total of \$178,000,000. It is to be remembered that the Empire imports from all countries these goods to the amount of \$2,571,000,000. The British Empire presents a tremendous opportunity for the development of export on these commodities.

realize. For instance, in the last fiscal year, ended March 31st, the Dominion's total exports were valued at more than a billion and a quarter dollars, or to be exact \$1,250,456,297. This represents an export trade of more than \$100 for every man, woman and child in Canada. At the beginning of the present century Canada's export trade amounted to less than 200 million dollars.

Another method of gauging Canada's export trade is found in the fact that last year the country's exports of manufactured products alone amounted to about the same as her total production of manufactured products in 1900. In other words, Canada is exporting as much in manufactured articles to-day as the total output of every factory in the Dominion twenty-eight years ago. Then few figures may give readers some comprehension of the immense increase in export business.

Most public men and business men, no matter what their politics may be, agree that export trade is possibly the most valuable asset the Dominion has. Canada's natural resources are so varied and so rich that it would be impossible for Canadians to consume them. Take wheat for example; it is manifestly impossible for 9,000,000 people to consume 400,000,000 bushels of wheat annually. Canada's future prosperity therefore is bound up in seeking markets abroad for her surplus production.

When Canadian business men seek to sell their products in other lands, they cannot hope to control prices. They have to meet competition from thousands of other business men and producers living in other countries. They are faced with fierce world competition in maintaining their hold on export business. To maintain this trade of a billion and a quarter dollars a year and to increase it, Canadians must become acquainted with every legitimate method known to business. They must learn how to pack their goods in the manner desired by the foreign buyer, they must learn how to keep contract dates, they must learn how to ship their goods by the most economical and direct routes. And perhaps most important of all Canadian goods must always be kept up to the standard of the sample submitted.

The Department of Trade and Commerce, at Ottawa, is doing everything in its power to further this export trade. Years ago a Commercial Intelligence Service was established, and trained trade commissioners sent to the world's trade centres. In fact, Canada had the first trade commissioners abroad, thus inaugurating a system which has been widely copied. To-day this country has 24 trained trade commissioners in strategic business centres. More men are now in training to go to other places. The government has by subsidy, and other means, obtained first-class shipping facilities to these business centres. The trade commissioners are constantly on the alert, seeking out opportunities for the selling of Canadian products. Whenever they learn that there is a chance of a Canadian good being placed, they immediately communicate with the Commercial Intelligence Service at Ottawa, giving all information they possibly can. This information in the possession of the service at Ottawa is at the disposal of any Canadian producer or manufacturer. This system, the result of some years' experience, has been carefully organized and working smoothly. To-day the Canadian manufacturer or producer can find out with little trouble, and no expense, if his products can be profitably marketed in almost any part of the world. So encouraging have results been from the export system adopted by Canada, and so well have Canadian goods been received abroad, that it is fairly prophesied that within a decade Canada's exports will amount to double the present total.

Mr. Malcolm as the responsible head of this department believes in keeping Canadians fully informed as to opportunities abroad. To do this he is reaching the people through newspapers, magazines and trade journals.

William Patterson left by Tuesday's local for Brooks, where he will take charge of a small coal mine proposition.

THE DEPARTMENT OF TRADE AND COMMERCE OTTAWA

F. C. T. O'HARA, Deputy Minister

Hon. JAMES MALCOLM, Minister

THE PASS FIFTEEN YEARS AGO

(The Blaimore Enterprise, 1913)

May 16.—Ignace Kalezek died in hospital at Frank on Tuesday, the result of being hit on the head with a bottle by a fellow miner named Wasyl Mundi during a drunken brawl.

A man named Janigo was killed in the Bellevue mine last night.

Mr. Cardwell succeeds Joe Four-shong at the Pastime barber shop.

A six-room house, with furnace, electric light and water in, is being offered for rent by J. H. Farmer for \$20 per month.

A well-attended smoker was held at the Frank hotel on Wednesday night by the Stationary Engineers' Association.

An inter-school baseball league has been formed between the boys of Coleman, Frank and Blaimore schools.

"The Prince of Tonight," a gorgeous \$50,000 musical fantasy, will appear at the Blaimore opera house on Wednesday night next. Prices \$1.50, \$1.00, 75c and 50c.

The Okotoks Advance has ceased publication.

T. W. Sheppard, of Calgary, paid \$5.00 on Monday for the privilege of motoring through Blaimore at an excessive speed.

V. F. Ruzicka died at Frank on Wednesday morning, and interment took place at Blaimore today, the Bohemian band in attendance.

Mrs. F. M. Pinkney and Mrs. F. M. Thompson and children returned from a visit to Scotland on Monday.

There is to be a smiling contest between bachelors and maids at the Cosmopolitan hotel on Saturday night. Competitors must be upwards of thirty-five years of age and be natural as possible.

Walter C. S. Hopkirk, who has been in the employ of the Hudsons Bay Co. at Calgary, has accepted a position with the F. M. Thompson Co. here and started in on Tuesday.

Joe Handley, of the F. M. Thompson Co. staff here, has accepted a position with the Frank Co-Op.

Paul Barattelli, of Fernie, has taken over the boarding house at Maple Leaf.

Weather permitting, the Bellevue brass band will give an open-air concert in Blaimore on Sunday afternoon.

May 23.—At a meeting held at the Cosmopolitan hotel on Wednesday afternoon, the Crows' Nest Pass Automobile Club was organized, with the following officers: president, A. W. Robbins, Blaimore; first vice-president, George A. Clair, Coleman;

second vice-president, J. Thompson, Frank; secretary-treasurer, H. E. Lyon, Blaimore; committee—R. M. Brisco, Joe Plante, Harry Antel and J. N. Rowell. The membership fee was set at \$5.00. The territory includes Burnis to Crows' Nest. The objects of the club will be chiefly to agitate for good roads and to encourage tourist traffic through the Crows' Nest Pass.

Wasyl Mundi, accused of the murder of Ignace Kulsek, appeared before Inspector Belcher at Bellevue on Tuesday and was committed for trial at the next sitting of the criminal assizes, which will likely be in June or November. W. M. Campbell, K.C., of Macleod, for the prosecution; L. H. Putnam, of Blaimore, defending.

The West Canadian Collieries, Limited, are advertising for tenders for the cutting, hauling and loading on cars of approximately 700,000 feet of mine props from the company's property at Lillie.

Saturday will be field day for Cowley, Passburg and Coleman.

W. A. Beebe has returned from Detroit, after an absence of about a month.

Ninth Avenue is now opened up as a regular railway crossing.

Al. Manuel, of Frank, has commenced laying the foundation for a large hotel at Burnis.

Local and General Items

Cardston's tax rate for 1928 has been struck at 33 1/4 mills, being two mills lower than last year's.

The Coleman Elks' carnival concluded on Tuesday night. The affair which occupied three nights, was quite successful and was patronized by people from all parts of the Pass.

The water in the South Fork river was so cold last week end that Walter Fisher claims to have found chunks of ice the size of a hen's egg in the stomach of a rainbow trout.

Mrs. Altermatt has changed her place of residence from the Green hill hotel to Apartments 1 and 2 over the Blaimore Hardware Co's store where she is keeping house and conducting a music studio.

The Dominion government has made an appropriation of \$65,000 for a headquarters building, housing customs, etc., to be erected at Barb, near the international boundary south of Cardston.

The remains of Mrs. Ruzicka, who died at Frank on Friday evening, were laid to rest here on Sunday afternoon, following a service held at St. Anne's Catholic church. The funeral was very largely attended. Mrs. Ruzicka was an old timer of the district and very highly respected by all who knew her.

Local and General Items

As an ocean liner, the Mauretania recently established a record, doing 652 miles in twenty-four hours.

An exchange remarks that the easiest way to make a "hole in one" is to try it with a spade in the potato patch.

What this country needs is a fast golf fairway, sloping downhill and with a deep groove through the middle.—Hanna Herald.

Angelo Altomare, proprietor of the Roma Hotel at Fernie, was fined \$500 and costs by Magistrate Henderson last week for having sold beer to a lad under twenty-one years of age.

Count Valentino Rinaldi's medical attendants have advised him to take a week's rest in camp up the North Fork and his eminence will leave for that point on Sunday morning under heavy escort. The count says: "There'll be no bombarding there!"

There are two reasons why many a small town is tottering along with the weakness of a sick kitten. One is that the residents send out for the goods they buy. The other is that the stores don't advertise the goods they have for sale.

An accident that was purely unavoidable, occurred at a street corner in East Blaimore on Thursday evening, when the little son of Mr. and Mrs. Jack Pilford was knocked down and run over by a car rounding the corner, sustaining a few cuts about the head and body.

Travelling in a sixteen-foot canoe, two Edmonton boys, Robert Copman and John Nolan, hope to complete a \$600-mile trip from Edmonton to Natamoras, Mexico. Such a trip has never been tried before and will constitute a world's record for canoe travelling if completed.

"Bill" McKinty, of Cranbrook, was a visitor here on Friday last. Bill will be remembered by many friends in Blaimore since working on the construction of the new tipple and washery here. He missed very much his old comradot here, Mr. George Langstar.

Vernon Booher, of Mannville, has been committed to stand trial, charged with the murder on July 9th of his mother, Mrs. Eunice Booher; his brother Fred, and two hired men, Vasyi Rosiuk and Gabriel Gormley. The committal came at the conclusion of the preliminary hearing.

Roddy McDonald lost to Roy Mitchell, light-heavyweight champion of the Maritime Provinces in the ninth round of their ten-round bout in Sydney, Nova Scotia, on Tuesday last week. The promoters were so well pleased with Roddy's showing, that Fitchell and McDonald have been engaged for a return fight.

Dr. Elliott, of Corbin, purchased a tubedeker "Dictator" from the Crows' Nest Pass Motors yesterday. The doctor is taking his family on a three month motor vacation to western Canada and the United States. He says it is seven years since he had a holiday.—Fernie Free Press.

The Lady Nelson, the first of the five steamers under order for the Canadian National Steamships and which will engage in the West Indies service, was successfully launched at Birkenhead, England, on July 18th. The christening ceremony was performed by Machine Lapointe, wife of Jon. Ernest Lapointe, Canadian minister of justice.

Seventeen passenger coaches were necessary to convey the Lethbridge miners, and their families to Coleman for their annual outing and picnic on Friday last. The weather man looked with favor upon the party and everything during the day seemed to go with a bang and a joyous swing. This annual event is growing in popularity and the time is coming when the whole city of Lethbridge will feel like taking a day off for this opportunity to crowd into the glories of the mountains.

Mr. Cole wishes to make the important announcement that he has secured for an early showing at his theatre in Bellevue "Rose-Marie," the brilliant picture that ran for three years in London and two years on Broadway. This picture is a romance of the R.N.W.M.P. and the Canadian wilds, and is booked for next Friday and Saturday, August 3rd and 4th.

alted Ruler; J. R. McLeod, Secretary.

BLAIRMORE UNITED CHURCH
Rev. J. W. Smith, B.D., Pastor

Serve the church that the church
may serve you.

Services for Sunday, July 29, the
Pastor in charge—

SENIOR SCHOOL at 11 a.m.

JUNIOR SCHOOL at 2 p.m.

EVENING WORSHIP at 7:30 p.m.

"O come let us worship and bow
down, let us kneel before the Lord
our maker."

Mr. Williams, musician of the Pon-
oka mental hospital, will play the
organ for the service on Sunday
night. Mrs. Williams and Rhonnie
Williams, the boy soprano who last
year took second place in the Alberta
Festival, and although he took third
place this year at Lethbridge was
within two marks of the highest, will
sing at this service. Rhonnie is a
real musician as well as a singer,
but the fact that he is now fourteen
years of age means that this may be
the last time his beautiful soprano
voice will be heard.

VACATION SCHOOL

On Friday night of this week, July
27, at 8 o'clock, in the United church,
the closing exercises of the school
will be held. The evening will con-
sist of the closing exercises, songs
by the different grades, memory
work, recitations, exhibits of handi-
work, presentations by the children
and one or two surprise items. The
general public is invited and it is
hoped that a generous offering will
be received.

We are very glad to acknowledge
a gift of \$10.00 received from the
Pythian Sisters. This brings our
total receipts up to \$31.00. The cost
of the school has been about \$150.00.
In the next week's issue of The En-
terprise, we shall publish a state-
ment of the costs and acknowledge
all special gifts.

Four Chicago youths have been
awarded free board for life for the
killing of a movie usher.

GOOD-BYE, ORGANIZER

The deportation of an organizer of
the Ku Klux Klan, may be considered
as a definite step by the Dominion
government to check the growth of
the "invisible empire" in the Domi-
nion, although a technical legality
hides the true purpose of the order to
get out.

The Ku Klux Klan is a discredited
organization—its power was purely
mythical when strong men com-
menced their denunciations and al-
though it is still faintly struggling
for continued existence in some of
the southern states, its activities have
been so corrupt that even the politi-
cal hysters are fighting shy of it.
There is no room on the American
continent for such an organization
as the Ku Klux Klan. Intelligent
people have no desire to either dic-
tate, or be dictated to, by the use of
threats and bullying tactics.—Drum-
heller Mail.

Word comes from Calgary that
"Buster" Connolly is slowly recov-
ering.

Quite a number of local Walton-
ians are enjoying fishing up the
North Fork river.

Mr. and Mrs. John Baird have ar-
rived in Coleman to reside, Mr. Baird
taking a position in McGrath's bar-
ber shop.

H. D. Gerry will conduct an auction
sale at Pincher Station on Saturday
at 1 o'clock, of farm stock, imple-
ments, etc.

Mr. Evan Morgan has about re-
covered from the effects of an acci-
dent in which his face was somewhat
marked by a shot in the mine.

Mr. Eric Muncester returned this
morning from Edmonton, where he
had been engaged marking paper
for the departmental examinations.

A new industry was encouraged by
the Newfoundland legislature when
one firm was granted exclusive rights
for a period of three years to deal
in shark oil and the products of
sharks.

W. J. Bartlett has been elected
vice-president of the Vancouver and
New Westminster District Trade
and Labor Council for the ensuing
year. Bartlett is a native of New-
foundland.

COWLEY HAPPENINGS

Mrs. James Leigh and Verena have
gone to Vancouver for a holiday.

Rev. Mr. Smith, of Blairmore, con-
ducted service in the United church
here on Sunday afternoon last. Next
Sunday, service will be held in the
church at 2:30 p.m.

John R. Velich and wife, from Long
Beach, California, accompanied by Dr.
and Mrs. R. McNath, of Gardena,
California, after spending a few days
here the guest of Ralph Velich, re-
turned home by way of Yellowstone
Park, making the round trip by mo-
tor.

DON'TS FOR MOTORISTS

(By R. A. Stapells, President, On-
tario Motor League)

As the volume of traffic on the
streets and highways of the province
will be at its maximum during the
next few months, the advice to mo-
torists, contained in the appended
twelve suggestions and compiled by
the president of the Ontario Motor
League, is very timely. The sug-
gestions are as follows:

1. Don't assume that kiddies will
stay on the sidewalk. They must be
your special care first, last and al-
ways.
2. Don't ignore the pedestrian's
rights. He also pays taxes.
3. Don't sit like a bump on a log.
Give signals and let the other fellow
know what you are going to do.
4. Don't be a swivel-neck driver.
Keep your eye on the road.
5. Don't dawdle on the way. This
is the 20th Century, not the Dark
Ages.
6. Don't exceed the speed limit.
Use ordinary everyday horse sense.
7. Don't cut in—it may be smart
but it is not safe.
8. Don't demand your right-of-
way. Allow a margin of courtesy
for safety's sake.
9. Don't use glare lights. It is
against the law, vulgar and danger-
ous.
10. Don't neglect your brakes. You
may save a life by stopping quickly.
11. Don't take a chance at a rail-
way crossing. It might be your last
day.
12. Don't drive with a drunken
man at the wheel. Solomon saw it
coming and said "The companion of
fools will be destroyed."

First of New Fleet at Saint John

Saint John Harbour

Completing her maiden trip across
the Atlantic, the "Beaverburn,"
new fast cargo liner for the Canadian
Pacific Railway fleet, docked at
Saint John, N.B., to receive the
official welcome of several officials
of that company, among whom
were, W. R. MacInnes, vice-
president in charge of traffic, and W. A.
Wainwright, assistant to the chair-
man, Canadian Pacific Steamships
Limited, also the harbour officials
of that port. A thorough inspection
was made of the vessel and apprecia-
tion of her qualities was expressed.
The Beaverburn is the first of five
fast cargo vessels, which will be
known as the "Beaver" class, dis-
placing 10,900 tons and having a
length of over 500 feet. These ships
are capable of making the ocean
passage in ordinary weather condi-

tions at an average speed of fifteen
knots, the Beaverburn, however,
attained a speed of 16 knots on her
trial trip.

These cargo ships will provide a
weekly departure from Canada
every Friday, arriving in London
nine and a half days later. Montreal
is to be their Canadian port during
the summer and Saint John in the
winter. The liners are considered
the finest and highest class of cargo
ships afloat today. Another steamer

of the passenger style, the Duchess
of Bedford will be launched at the
Claydon shipyard January 24.
Altogether there are to be five
Duchess liners attached to the Cana-
dian Pacific Steamships. To date
the Duchess of Athol has been
launched, the Duchess of Bedford
will be launched shortly, while in
1929 the third and fourth to be
delivered will be the Duchess of Rich-
mond and Duchess of Cornwall,
with one or two ships to come.

"Safety First" on the Highways

At the risk of being somewhat tiresome, the writer of this column feels impelled to once again direct attention to the subject appearing as the title to this article. Justification for such action, if indeed, any justification is needed, is to be found in certain well established facts.

In the three prairie provinces last year the number of motor cars registered exceeded half a million.

In all three provinces, Governments and municipalities are straining their resources in the construction and improvement of good market roads and provincial highways, and every mile so constructed or improved results in an increase in motor vehicle traffic and an increase in the speed at which most of the cars will travel.

In the improvement of highways, advances are being constantly made in the direction of making them as nearly as possible "safe" through increases in width, reduction in grades and curves, guard rails at curves and danger spots, and a standardized system of marking the highways, indicating turns, curves, railway crossings, danger spots, etc.

On the other hand, year by year, manufacturers of cars are increasing the power and speed of cars, and with gradual price reductions their use is becoming almost universal. It is true, of course, that four-wheel brakes, and other safety devices, are being added, and manufacturers are interested and active in making their cars as nearly "fool proof" as they can be made.

The fact to emphasize, and which it is important should be drilled into the minds of every motorist, is that no matter what Governments and municipalities may do in the matter of road construction, and no matter how strongly and carefully motor cars may be built and equipped from the prevention of accident standpoint, the human element remains. Neither roads nor cars can be made "fool proof," and the unfortunate fact is that the reckless driver is just as great a danger to others as he is to himself. If, the highways of the country are to be made safe, it is evident that there must be a decided change in the attitude and conduct of many thousands of motor car drivers, and the public generally.

In an address before the annual convention of the Union of Saskatchewan Municipalities, Hon. S. J. Latta, announcing the early inauguration of a "Safety First" campaign throughout the Province, stated that he had recently read in a newspaper that someone was either killed or seriously injured every forty seconds in an automobile accident in the United States, and that during 1927 approximately 26,618 persons were killed and 793,700 injured in such accidents. He further referred to the fact that at a conference held in the Parliament Buildings of Ontario it was revealed that 1927 automobile accidents cost 422 lives in Ontario, an increase of 124 over 1926, while 3,976 others were injured. It was further reported that fatalities were in the proportion of eight to each one thousand car licenses.

These are appalling figures and certainly indicate the need of somehow controlling this great modern convenience. What was the cause of these accidents? Were they preventable? The results of investigations in the United States show that 11,705 highway accident fatalities in 1927 were caused principally by motorists, of which 3,765 were caused by inattention, 2,706 as the result of speeding, 2,553 through traffic violation, 1,659 from intoxication, and 1,882 from miscellaneous causes.

About an equal number of fatalities, 11,397 to be exact, were caused principally by pedestrians, of which number 3,538 occurred through children playing in the street or crossing in violation of traffic regulations, 3,069 from adult jay-walking, 1,819 through inattention, 1,591 as a result of confusion, and 1,250 from other causes.

As compared with these more than 23,000 fatalities caused by the human element, there were only 1,290 resulting from fog, snow or rain, 662 from some defect in the vehicle, 558 from skidding, 383 from road defects, 244 from strong lights, 244 from poor street lighting, and 105 from confusion in dimming lights. In other words, physical conditions were responsible for 3,488 fatalities as contrasted with over 23,000 for which people themselves were responsible.

Surely such a record provides ample justification for repeatedly urging people to exercise care, to realize that Common Sense will prevent accidents and should be applied, that the Safe way is the Safe way.

Prominent Visitors From Ireland

Marquess of Dufferin and Ava Will

Make Tour of Dufferin and Ava

The Marquess of Dufferin and Ava, speaker of the senate of Northern Ireland, who is a son of a former governor-general of Canada, was a passenger on the Empress of Scotland, which arrived at Quebec recently. In a short interview, he declared it was his intention to see aeroplanes from coast to coast on his present stay here. Regarding the industrial situation in Northern Ireland, the marquess declared that, with the exception of a slight improvement in the shipbuilding industry at Belfast, there was little change as compared with a year ago.

Father (to his old friend's pretty daughter): "Good-by, my dear, I won't kiss you, I have such a cold."

His son (with alacrity): "Can I do anything for you, father?"

The first typewriter was invented by an Englishman early in the 18th century; the first workable pattern, however, was designed in Detroit just 100 years ago.

Third Wrigley Marathon

Krist Vlietkoetter a Sure Entry in This Outstanding Event

While much dissatisfaction has been expressed by Vlietkoetter and his manager regarding the shortening of the distance for the Third Wrigley Marathon, again to be conducted by the Canadian National Exhibition this year, there can be no question about his entering as he is daily training in Lake Ontario.

He seems to be carrying more avoirdupois than he did last year, and experts say that he is a little sluggish. This, of course, at this stage of the game, means little. George Young is the size of a young elephant and swims more or less sluggishly in consequence. Both of them will undoubtedly take this off in the course of their intensive training, so that comparisons are more or less impossible at this time.

Vlietkoetter is a great swimmer and unlike most distance men is fast. Witness his feat of last year when he covered the first five miles under 28 minutes each. That should be fast enough to win this year's Marathon.

From a spectacular standpoint the Third Marathon will surpass the Second. The course will be along the sea wall, and will be in full view of the tens of thousands of spectators who will again flock to see the great event.

The entries are now coming in thick and fast and it is estimated that they will exceed those of last year.

GUARD BABY'S HEALTH IN THE SUMMER

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic, diarrhoea and dysentery, come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to banish them. No other medicine is of such aid to mothers during hot weather as Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

London will add 75 double-decked omnibuses, fitted with pneumatic tires, this year.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

Many Farmers Join Pool

Estimated That About Half the Wheat Crop Of West Contributed By Pool

The Canadian Wheat Pool, which embraces 142,000 Canadian farmers, continues to add to its membership. In a single day this month contracts were received at head office covering a total of nearly 100,000 acres of grain.

Under the Canadian Wheat Pool system farmers voluntarily sign contracts in which they agree to market all their wheat through the Pool for a period of five years. About half the wheat crop of Western Canada is controlled in this way, and sales by the Pool average over a million dollars for every business day of the year. It is claimed that the Pool has increased the price of wheat to the farmer without increasing the price of bread to the consumer.

Canada's Fox Farms . . . Forty thousand silver black foxes were registered in Canada from various fox farms during the past year, the report of the Canadian Silver Black Fox Association shows. Saskatchewan registered only 793 of the pups, fox farming in this province not yet having reached the proportions attained in other sections of the Dominion.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

Did Not Find Out . . . A popular Scotch doctor who was very sensitive about his age passed away suddenly. One of his friends suggested to the mourners that the secret would be disclosed on the plate in the casket. But when they looked at it, all it disclosed was:

Dr. Caleb McNabb.
Office hours from 2 to 4.

Susburn? Use Minard's Lintment.

W. H. U. 2748

THERE is nothing that has ever taken Aspirin's place as an antidote for pain. It is safe, or physicians wouldn't use it, and endorse its use by others. Sure, or several million who would have turned to something else. But get the real Aspirin (at any drugstore) with Bayer on the box, and the word *Genuine* printed in red.

Aspirin made near (registered in Canada) by Bayer Manufacturing. While it is well known that Aspirin means Bayer manufacturing, the public seldom realizes that the Bayer brand is stamped with their "Bayer Cross" trade mark.

New Settlement Area

District Near Edmonton Made Available By Building Of Branch Line

The penetration of branch lines of railway into the sparsely settled areas north and east of St. Paul de Metis has opened up a fertile district 50 miles square.

The district has taken on new life. In 1927, the railway was extended from St. Paul to Elk Point, and this year is being pushed on from Elk Point to Hensburg, a distance of 20 miles. It is expected that steel will be laid from the junction of the St. Paul-Edmonton branch near Ashmont to Bonnyville, 40 miles north-east of St. Paul. This line passes through a country containing many free homesteads and large blocks of high-class agricultural land. Close to this area is the Saddle Lake Indian Reserve, which was taken over from the Indians by the Land Settlement Branch of the Department of Immigration and Colonization, and over which families settled thereon. This settlement has proved a most successful one.

Demonstrated Her Skill . . . Winnipeg's first and only aviatrix, Eileen Magill, demonstrated her skill by soaring to a height of 8,000 feet with the Winnipeg Flying Club's Moth plane, and tail-spinning for the first time since she took her first solo flight.

Average Size Of Farms . . . The average size of a farm in Manitoba, Saskatchewan and Alberta is 358 acres, with 147 acres under field crops including \$6 acres in wheat, the acreage value is \$14,431.

Corns cause much suffering, but Holloway's Corn Remedy offers a speedy, sure, and satisfactory relief.

People who don't spend their money as we think they should are miserly.

Recipes For This Week

(By Betty Barclay)

GINGER ALE LEMONADE

4 lemons.
1 pint ginger ale.
1½ pints water.
1 cup sugar.

Place a small block of ice in a pitcher. With the juice of four lemons mix one cup of sugar, one and one-half pints of water, and one pint of ginger ale. Pour into pitcher and stir thoroughly. Allow to stand few minutes before serving. (Serves 6 persons.)

A REAL MEAL SALAD

½ cup nectars raisins.
1 cup cold cooked meat, cut in cubes.
1 tablespoon granulated gelatine.
½ cup cold water.
1 cup boiling vinegar.
1 tablespoon vinegar.
½ teaspoon salt.
½ teaspoon pepper.
1 teaspoon paprika.
1 teaspoon Worcestershire sauce.
1 cup diced celery.

Plump and drain raisins. Soften gelatine in cold water for 5 minutes, then dissolve in boiling water. Add vinegar, salt, pepper, paprika, and Worcestershire sauce. Let cool. When mixture starts to thicken stir in the plumped raisins and the meat cubes. Turn into a cold, wet, square pan. When firm cut in cubes. Arrange on lettuce. Sprinkle diced celery over top. Garnish with a spoonful of mayonnaise and a dash of paprika.

The Friend Of All Sufferers.—Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a balsam that has the blessing of half a continent. It is on sale everywhere and can be found wherever required for.

When some men bury the hatchet after quarrelling they go right out and dig up an axe.

Phantom Radios

Device Whereby Radio Fans Can Broadcast Through His Land Speaker

The genius of David W. Davidson, a railway telegraph operator, who likes to tinker around with radio sets in his off hours, has made it possible for the long suffering radio fan to shout his sentiments right into his loud speaker with the assurance that people for miles around will hear his protest.

The workings of the phantom radio, invented by Davidson, are very simple. The effect is to transform any loud speaker into a broadcasting microphone whose waves will ride out into the air on the wave length of the station into which the set is tuned.

At his home at Terre Hill, Penn., Davidson has talked through his receiving loud speaker to his neighbors as far as fourteen miles, getting his words in edgewise during the lulls of broadcasting programmes from Chicago, Pittsburgh and New York.

He says the secret of his invention is in the arrangement of the circuit, in which he uses a crystal and three ordinary tubes.

Davidson came to New York last week to demonstrate the "Phantom Radio." He has gone back home to continue his experiments.

Marks Alberta's First Mine

Cairn Erected In Lethbridge By Canadian Historical Society

The memory of a father of Confederation and the foundation of one of the most important communities and coal mining areas in the West, was recalled by the celebration at Lethbridge, on July 15. The Canadian Historical Association has erected a cairn in the town to commemorate the opening of the first coal mine in Alberta, in 1872, a period truly remote in the history of the west, before the Canadian Pacific Railway had appeared to open up the country to settlement. In the ceremonies, the Lethbridge Historical Society, the Natural Resources Department of the Canadian Pacific Board of Trade of Lethbridge, and Railway the City Council and others took an interest.

Demonstrated Her Skill . . . Winnipeg's first and only aviatrix, Eileen Magill, demonstrated her skill by soaring to a height of 8,000 feet with the Winnipeg Flying Club's Moth plane, and tail-spinning for the first time since she took her first solo flight.

Average Size Of Farms . . . The average size of a farm in Manitoba, Saskatchewan and Alberta is 358 acres, with 147 acres under field crops including \$6 acres in wheat, the acreage value is \$14,431.

German Prisoners Released

Thousands Of Prisoners Regain Freedom Under Amnesty Bill

The jail doors in Germany were opened for release of thousands of prisoners recently, when the Reichstag passed by more than the two-thirds necessary majority the most sweeping amnesty bill since the success of the Republican revolution.

Among those to be set free under the measure are the last of the Imperial Army soldiers who were sentenced by the Kaiser's court martial for desertion and other offences. The bill was opposed only by the Bavarian Folk party of the small Hanover party.

After passage of this measure the Reichstag adjourned until the autumn.

Every Home Needs Minard's Lintment.

MYSTERY ENDS BY FINDING BODY OF LOEWENSTEIN

Boulogne-sur-Mer, France. — The finding of the body of Captain Alfred Loewenstein, missing Belgian pilot, has cleared up most of the grim mystery surrounding his disappearance from a cross-channel aeroplane on July 4.

French and Belgian authorities will still have to determine whether Loewenstein accidentally fell from the plane as it flew 4,000 feet over the English Channel, or deliberately wrenched open the exit door and plunged to his death.

But the ugly rumors that the financier had perpetrated a gigantic hoax and was still alive were definitely set at rest by the finding of the body.

The battered body was found floating face downward ten miles off Cape Gris Nez, by the Boulogne fishing smack 555, Capt. Jean Marie Renaud, and was readily identified by a wrist watch engraved "Capt. Loewenstein, 35 Rue de la Science, Brussels."

Otherwise the body was unrecognizable, as it was in an advanced stage of decomposition.

The body was clothed only in under-drawers, socks and shoes, the latter bearing the name of an English maker. There was a severe wound in the abdomen and both feet were broken.

At the Boulogne morgue Dr. Boultray made a formal post-mortem examination, and the mayor of Calais, Leon Vancet, drew up a signed official statement pointing out the circumstances of finding the body and the result of the examination of the remains. No official conclusion was made public.

It is believed here that now that the mystery of the financier's disappearance has been solved, the French government will begin an official inquiry to establish whether death was accidental or a suicide, and if any of Captain Loewenstein's fellow passengers in the plane will share any responsibility for his death.

Bavarian Town Was Damaged By Floods

Oberammergau, Famous For Its Passion Play, Was Submerged

Berlin.—Oberammergau, the Bavarian town, famous for its Passion Play, has been partly demolished by flood.

The town was submerged when cloudbursts caused the river Lahn to overflow. Bridges were swept away.

Torches had to be used in relief work until dawn, because the local power plant was flooded.

As floods menaced the Oberammergau district the neighboring Telegberg forest, near Fussen, was ablaze.

Considering Air Insurance

Canadian Companies Believe People Will Want This Protection

Ottawa.—Canadian insurance companies are considering special forms of insurance for civilians recently themselves in aviation. It is learned. Recently a conference of actuaries and insurance medical authorities is said to have discussed the matter, realizing that soon the man who drives his own plane will be in the same category as the man who drives his own car, so far as the demand for insurance is concerned.

Motor Boat Beats Train

German Expert Drives Craft Nearly Mile a Minute

Cologne, Germany. — Fritz Von Opel, German sportsman and motor boat expert, beat an express train with his 500 horsepower motor boat in a race over a distance of 10 kilometers (6.21 miles on the Rhine).

Von Opel drove his boat over the distance in six minutes and 12 seconds, 2 1/4 minutes faster than the train running along the river bank. The average speed of the boat was 68.84 miles an hour.

Federal Government To Raise Pigeons

Ottawa.—The Dominion Government is going in for pigeon-breeding. The object is not, however, to increase the food supply of the country. It is to breed and train pigeons for purposes of communication. The department of national defence is to have charge of the work.

Glasgow, Scotland, was recently freed because some of its municipal street cars exceeded the speed limit.

Receives New Appointment

Dr. Delury Of Saskatchewan University Will Go To Manitoba

Winnipeg, Man.—Dr. J. S. Delury, of the University of Saskatchewan, will succeed Dr. R. C. Wallace as commissioner of mines and as professor of geology and mineralogy at the University of Manitoba. The appointment was announced by the government.

Prof. Delury expects to make the necessary arrangements with the University of Saskatchewan to make it possible to take up his work here September 1, when Dr. R. C. Wallace leaves to take over the position of president of the University of Alberta.

Dr. Delury is well known in Winnipeg and Manitoba. He has for many years the right hand man of Dr. Wallace in the department of geology and mineralogy at the University of Manitoba. In that capacity he rendered valuable service to the province. One of his latest contributions was a voluminous report which he prepared two or three years ago for the industrial development board. It is only a year ago since he left to organize the department of geology at the University of Saskatchewan as professor in charge of that department.

Dr. Delury is a graduate of the University of Toronto and of the University of Minnesota, and was in charge of the department of geology at the University of Idaho before he came to Manitoba in 1913.

Would Export Alberta Gas

Plan To Pipe Waste Gas To Saskatchewan, Manitoba and Montana

Lethbridge, Alta.—Alberta's problem of waste gas seems closer to solution and it appears to be in the piping of the surplus gas to Saskatchewan and Manitoba cities, and the cities of Montana.

In an interview here, Hon. Charles Stewart, minister of the Interior, gave it as his opinion the shipping of gas 500 miles to Winnipeg serving intermediate cities, including Moose Jaw and Regina, was feasible.

Again exportation of gas from the Rogers' field, southeast of this city, is now possible under Federal permits. The Range Oil and Gas Company has spudded in another well on the Rogers dome just south and east of the 80,000,000 foot producer, and the plans of this company and the Hardrock Oil Company, of Great Falls, who will drill the wells, are to have gas flowing through their pipe line into Montana by winter. A pipe line will be built to the Montana boundary, it is announced, either to link up with the present pipe line to Great Falls or as a separate line into that city.

Libel Action Settled

Action Was Brought By Cardinal Hayes Against London Newspaper

London.—Settlement of a libel action brought by Cardinal Hayes, of New York, against the Sunday Express was announced in the King's Bench division.

Counsel stated that a paragraph appearing in the newspaper had said that the cardinal was a man who excused murder of Kevin O'Higgins, Irish Free State minister of justice, on the ground that he was "an English hireling."

Counsel said that the defendants never suggested for one moment that the statement, which had been made by a contributor, could be justified and promptly did the honorable thing by apologizing for having published it.

Receive Royal Pictures

Gift Of King George Replaces Portraits Destroyed By Fire

Ottawa.—Pictures of King George, Queen Mary, Prince of Wales, King Edward and Queen Alexandra, were received by Eric Brown, director of the National Art Gallery, on behalf of the Canadian Government. These portraits are the gift of King George and will replace the pictures of these royal distinguished members of the royal family which were in the old parliament buildings but were destroyed when the buildings were burned in 1916.

Will Tour Canada

Quebec.—Fifty members of the National Chamber of Commerce, of Great Britain, headed by Counsellor James Stanworth, president of the Chamber, arrived here and immediately proceeded to Montreal by train. The party will tour Canada, staying in Montreal two days before going to Ottawa.

Russia Buys Canadian Wheat

Further Sales Of Canadian Wheat To Russia Are Announced

Winnipeg.—Further sales of Canadian wheat to Russia were announced at the grain exchange here. That country has taken another 1,000,000 bushels, bringing her total purchases during the past fortnight to 9,500,000 bushels.

A good portion of the grain was No. 3 Northern Manitoba. Italy is credited with the purchase of one million bushels of Durum wheat recently, mostly from the local market.

Demand from other European countries remains indifferent partly because of increased native supplies and partly on account of prospects for large crops on the North American continent this year.

Feeling Against Nobile

Leader Of Italia Expedition Under Criticism In Norway

Oslo, Norway.—Feeling against General Umberto Nobile, leader of the Italia expedition, is making itself felt in Oslo.

The newspaper. Aftenposten removed a picture of the general from a show case during the day as threats had been made to destroy it. Several Danish explorers have proposed Fridtjof Hansen as chairman of a court of honor to investigate Nobile's leadership of the expedition. Hansen declined this but said that he thought there were several errors in Nobile's expedition that need closer investigation.

CONSERVATIVES WIN IN B. C. BY LARGE MAJORITY

Vancouver.—The Liberal Government which has held power in British Columbia for the past twelve years, and which has been led by Premier J. D. MacLean for the past year, was defeated in the provincial elections, and the Conservative party, under the leadership of Hon. Dr. S. F. Tolmie, was elected to power.

The Premier and at least two of his ministers were defeated. Dr. Tolmie was elected in Saanich. Premier MacLean was defeated in Victoria; Hon. Dugald Donaghy, minister of finance, in Vancouver; Hon. R. D. Harrow, minister of agriculture, in Chilliwack.

Liberals have been elected in New Westminster, Cranbrook, and Nanaimo. Conservatives have been returned in Vancouver six, Victoria four, Saanich, Burnaby, South Vancouver, North Okanagan, Chilliwack, Cowichan-Newcastle, Comox and The Islands.

The Liberals gained Cranbrook from the Conservatives, while the Conservatives have gained all six Vancouver seats, five from Liberals and one from the now defunct Provincial party; Chilliwack from Liberals; Burnaby from Labor; South Vancouver from Labor.

Mrs. Mary Ellen Smith was defeated by R. H. Fooley, in Esquimalt. Of the 48 seats contested in the provincial election of 1924, in the Legislature, the Liberals carried 23 in the last contest; the Conservatives, 17; Labor 3; Provincials 3; Independents 1; and Independent Liberals, 1.

Norwegian Journalists Visiting Canada

Party of representative Norwegian journalists now touring Canada, under arrangements made by the Canadian Pacific's Department of Colonization and Development—visiting the various Norse settlements in the Dominion and gaining first-hand impressions as to immigration prospects.

PREMIER ELECT FOR B.C.

Hon. Dr. S. F. Tolmie, leader of the Conservative Party in British Columbia.

Clark's Status Discussed

Duties Of British High Commissioner In Canada Debated In House

London.—The British Government's newly appointed high commissioner in Canada, Sir William Clark, who is sailing for Ottawa shortly, and the duties of the newly created position were discussed in the House of Commons when F. J. Hanson, Conservative, Moseley, asked whether the High Commissioner would take precedence over the representative of all foreign powers at Ottawa, and if in submitting proposals respecting British commercial interests to the Government of Canada, he would have full diplomatic support of his Majesty's government in Britain.

Right Hon. L. C. M. S. Amery, Dominion Secretary, in replying reminded the questioner of the similar case of the Dominion high commissioners in Britain, who ranked immediately after cabinet ministers, but not before foreign ambassadors.

It was of course contemplated that the high commissioner of Great Britain, in Canada, would be authorized to make representations on commercial questions to the Canadian government when instructed to do so by His Majesty's government in Great Britain, the minister said.

Statistics Show Crime Increase In Canada

Convictions Recorded In 1927 Higher Than Previous Year

Ottawa.—Crime is increasing in Canada. Latest official statistics available show that for the year ended September 30, 1927, the number of convictions recorded reached a total of 212,075 as compared with 187,361 for the preceding period ended September 30, 1926.

The number of indictable offences returned for the year under review, according to the Dominion Bureau of Statistics, was 23,526 charges and 18,835 convictions. Summary convictions for non-indictable offences amounted to 193,240.

Will Succeed Dr. Wallace

Winnipeg.—Dr. J. S. Delury, of Saskatchewan, will succeed Dr. R. C. Wallace, as commissioner of Mines and mineralogy at the University of Manitoba. Dr. Delury expects to take over his duties when Prof. Wallace leaves to take the position of Professor of Mines at the Alberta University.

Canadian Militia Promotions

A Number Of Transfers and Promotions Are Announced

Ottawa.—The rank of "Brigadier" recently introduced in the British Army has been adopted in the Canadian Militia with effect from July 1. The temporary rank of "brigadier" is in substitution for the temporary ranks of colonel commandant and colonel-on-the-staff.

Orders promulgated from defence headquarters announce a number of important promotions in the Canadian Militia. Among them are the following:

Major E. H. Cope has been promoted to the rank of lieutenant-colonel and to command the Vancouver Regiment with regimental headquarters at Vancouver, B.C. vice lieutenant-colonel B. G. Wolfe Merton, M.C., who has been transferred to the reserve of officers. Major W. W. Henderson has been promoted to the rank of lieutenant-colonel and to command the 2nd regiment, the Alberta Mounted Rifles, with regimental headquarters at Pincher Creek, Alta., vice lieutenant-colonel J. H. Jackson, transferred to the reserve of officers.

May Establish Trade Treaty With Germany

Flour Would Lead Canada's Export List, Says N. B. Palmer

St. John, N.B.—Canada export trade with Germany will be greatly increased under favorable treaty agreements which the Dominion is now endeavoring to establish with that country, said Max B. Palmer, of Calgary, newly appointed assistant Canadian Trade Commissioner to Hamburg, who was here in connection with a tour of the Maritime provinces with a view to developing Maritime export trade with Germany.

In speaking of Canada's trade conditions with Germany, Mr. Palmer stated that at the present time Canada is discriminated against as a result of existing agreements which particularly affected the export of flour as well as other commodities. Should the trade treaties being advanced by the Canadian Government go through successfully, Mr. Palmer is of the opinion that flour would lead Canada's export list to Germany.

ASSASSIN OF GEN. OBREGON IS IDENTIFIED

Mexico City.—Police headquarters semi-officially announced that the assassin of General Obregon had been identified as Jose de Leon Toral, an art student, aged 23, a native of Lagos, in the State of Jalisco.

He is said to have lived at Ciudad Juarez, but to have come to Mexico City six months ago seeking work. Police said they found upon him a picture of the Catholic priest, Miguel Augustin Proquierez, who was executed in connection with the attempt to assassinate Obregon with bombs last November.

It was said that de Leon Toral refused to admit accomplices and insisted throughout his grilling that he alone was responsible.

Federal district police arrested and held for investigation Emilio Casado, proprietor of the restaurant where Obregon was killed at San Angel, and all twelve employees of the place.

Government censorship of despatches was still in force.

El Universal Grafico says that the mother and wife of the assassin have been arrested and are being held.

In a signed statement, President Plutarco Elias Calles declared that the assassin of General Obregon had admitted the motive of his crime was religious fervor.

There were innumerable rumors in the capital of uprisings and other killings, but all proved to be untrue. Intense excitement prevailed everywhere, but neither the newspapers nor the government had any information of trouble breaking out anywhere in the republic.

The war department issued an official communique saying that the army would guarantee the public peace.

President Calles was surrounded by a strong guard. All saloons were closed, as were theatres and other places of amusement. Many of those known to be opposed to Obregon fled from Mexico City before the fury of his friends and supporters, which were kept in bounds only by police precautions. The headquarters of Luis Morones, Secretary of Labor, and Obregon's greatest political opponent, were surrounded by a guard at the instance of President Calles, who feared that there might some attempts at violence.

GENERAL NOBILE TO RETURN HOME IN QUIET MANNER

Kings Bay, Spitzbergen. — The man who came from Italy in a giant airship and circled the North Pole to the applause of a world which loves brave gestures and deeds of daring.

General Umberto Nobile, commander of the dirigible Italia, will return home on a coal freighter, avoiding all possible ports of call, it was announced by one of his associates.

The general will travel over an unknown route to an unannounced destination where he will be picked up by a motor-driven schooner and taken to Germany or France. It was said he would leave in a few days.

Nobile will not travel with the men who went into the Arctic with him—fifteen men, of whom two were left corpses on the ice and six others blown away in the wreckage of the Italia to probable death.

The seven men who were rescued by the steamship Krasan, after Nobile had been brought out by the Swedish aviator, Captain Elmer-Paul Lundberg, will return at least a part of the way, aboard the Italia's base ship, Clitta Di Milano.

Nobile will avoid touching at any port in the Barents Sea, a friendly sentiment has been manifest in Norway toward the Italian polar expedition since two of Nobile's companions, Captain Adalberto Mariano, and Filippo Zappi were picked up on the ice to tell how Dr. Malmgren, Swedish scientist, had been left behind at his own insistence to die by a grave scooped out of the ice.

Mariano and Zappi arrived with five other rescued Italians on the Krasan recently.

The Clitta Di Milano probably will proceed to Narvik as soon as possible with the survivors, then return to King's Bay to continue the search for twelve lost men—six with the Italia, and six, including Roald Amundsen, in the Prøva 39, a plane which left Tromsø, Norway, June 18, to search for Nobile.

Information from Stockholm indicated the government would order the rescue expedition under command of Captain Thörnqvist to return immediately to Sweden.

Hail Damages Crop Of Wheat King

Experimental Plots Of J. C. Mitchell, Dahinda, Are Badly Hit

Dahinda, Prospect of J. C. Mitchell, Saskatchewan Wheat King, regarding the international crown, were seriously jeopardized by the worst hail storm experienced in this district, which ruined many crops. Mr. Mitchell had 240 acres of wheat completely ruined and on 50 acres, a 50 per cent loss. Fortunately the hail did not damage 150 acres of first and second generation of experimental grains.

The damage to the Mitchell crop will be of far reaching consequence in the wheat production of the West, for included in the damaged crop were experimental plots which the Wheat King had been carefully tending this summer. His plot of the famous mystery wheat, Rosard, was also a complete loss.

No Claims Paid This Year

Government Does Not Intend To Pay Reparations Now

Ottawa, Ont.—Although the War Reparations Commissioner has made his report which was made public last season, the government does not intend to pay the claims for a year. Part of the money for this purpose was included in Hon. James A. Robb's surplus. There was much disappointment among the big claimants at the size of their awards. These may be revised by the Government, but the 3,000 small claimants will be satisfied with what War Reparations Commissioner F. Riel found due them.

Over Million For Memorial Fund London.—The fund contributed by Britons, the world over, for a national memorial to the late Queen Alexandra has reached a total of \$1,165,000. The visible memorial will take the form of a bronze group designed by Alfred Gilbert and will be erected by Marlborough House, opposite St. James Palace, but the bulk of the fund is to be used to extend the present nurses' pension fund.

Have Restored Tiles

Prague.—The Czech-Slovakian government has introduced a measure in parliament restoring medals and titles which were abolished after the revolution.

Mark Twain once said: There are two times in a man's life when he should not speculate—when he can't afford it and when he can.

LOST—Child's brown coat, on Sunday last, on road to South Fork. Finder please return to Mrs. S. McKay, 5144 Street, Blairmore.

The average person visiting Chicago is supposed to come away somewhat increased in weight. That is if they get their allotment of lead.

Blue grouse are greatly on the increase in this district and wherever one cruises in the bush or the hills, large flocks of young are to be seen.

D. McAllister, of the Lethbridge liquor act enforcement squad, has been appointed to take charge of beer distribution in Blairmore and arrived by yesterday's local.

Canada's women lecturers in the interest of prohibition have a splendid opportunity of doing Canada a big turn right now, if they will go over and assist the dries in the U.S.

Vernon Booher has confessed the slaying of his mother, brother and two farm hands at Mannville, because of his mother's continued nagging about a girl he was crazy about.

May seem strange, but Martin Luther was operated on for appendicitis at Battle Harbor, Labrador, on Sunday, July 22nd, and Dr. Grenfell performed the operation.

Mrs. John Barattelli died at Michel on Tuesday afternoon and the remains were laid to rest yesterday afternoon, quite a number of Blairmore friends and relatives attending.

Dr. Rose, of Hillcrest, accompanied by Mrs. Rose and children, left a few days ago on an extended holiday and business trip to eastern Canada and the States. He is being relieved by Dr. Padgett, of Edmonton.

Speaking of the big picture show at the Orpheum theatre last week, entitled "Desired Wives," one lady remarked: "Well, one thing about the present-day woman, a man can see just what he's getting."

Major Schoof came down on Saturday night's train, and he and Mrs. Schoof have taken up housekeeping in their residence here. The Major made an extensive trip into the Peace River and is greatly enthused over the pioneer prospects up there. So much so in fact that he has purchased a section of land and purposes homesteading an additional quarter section. Speaking of the renewed right given to one-time homesteaders, Major Schoof advises those applying for their renewed right to homestead to wire instead of write to the department of the interior at Ottawa. This costs about five dollars, but has the advantage of getting immediate results. Settlers are crowding that country, reminding one of the land rush here twenty to twenty-five years ago.—Clareholm Local Press.

A New Jersey editor died at his desk—probably for want of nourishment.

An Englishman can leave his property away from his family; a Scotchman cannot.

Fred MacKay had as his guests this week his father and brother from Medicine Hat.

George Chiaravano, of Bellevue, arrived from Calgary on Sunday afternoon with a new two-ton Federal truck.
